multi-exposure and self-timer. We tested all the various resolutions for still photos, and shot video footage with sound. While you will use this camera primarily for stills, the videos came out nicely. Videos are in 320x240 format, at 10 frames per second.

FUJIFILM has made a \$200 price reduction on the FinePix 4800Zoom, making it \$499. It's well worth it. For more information, surf to www.fujifilm.com.

Brother Printer-Fax-Copier-Scanner

While Hewlett-Packard, Canon and Epson come to mind when you're shopping for printers and fax machines, there are great values to be found with Brother products. We've reviewed several models over the years, and found them to be as good or better than some of their competitors' offerings.

Brother's MFC-6800, a multi-function unit, is just such an example. The MFC-6800 is a 5-in-one model, offering a monochrome laser printer, b&w copier, flatbed color scanner, plain paper fax and PC fax (faxing from within software programs).

Brother features the experience of pull-it-out-of-the-box and get down to business quickly. There's a large-format installation sheet with clear illustrations, so even non-techies should have no problems getting started. The toner cartridge/drum unit snaps in easily (unlike some printers

and multi-functions we've tested previously).

The laser printer features excellent 600x600 dpi output, and up to 10 pages-per-minute speed. The MFC-6800 works with either a standard parallel cable or USB cable. We tested it using USB (neither cable is provided).

The digital copier works using either the 30-page automatic document feeder (ADF) or the flatbed. Paper sizes are standard (8.5"x11") and legal (8.5"x14"). You can choose up to 99 copies, along with reduction and enlargement options (25 to 400 percent).

The color scanner has up to 9600X9600 dpi, with 24-bit full color. You use either the MFC-6800 control panel/LCD menu screen or the included ScanSoft and PaperPort software. The panel includes a "Scan to" button, allowing scanning directly to e-mail, saving-as-image or send to the OCR (optical character reading) application.

The PC fax mode works like a typical faxmodem, allowing faxing from within typical applications, such as word processing, graphics programs and so forth.

The top-quality MFC-6800 is compatible with Windows PCs, as well iMac/iBook, and G3/G4 applications. Street price is about \$450 (after \$50 rebate). See your computer dealer to find the best price, or visit www.brother.com/usa.
