- 10 FITNESS**  
Too many gym-goers neglect the triceps. And while it's important not to over-train, well-developed triceps lead to nice, bulging arms.

ANOTHER FINE GladysVISION GRAPHIC

First, choose a weight that you can comfortably extend over your head. If you *think* you can press 20 pounds, know that you can press 15 pounds. The single-arm extensions stress the entire triceps complex, particularly the inner and medial heads of the muscle group. The same is true of the two handed, one dumbbell extension. Have fun — but remember, use smooth, slow movements, and no cheating!

Begin by standing with your legs shoulder-width apart, and slightly bend your knees. While standing upright, take the dumbbell in one hand and with your palm facing front, then extend your hand up over the shoulder and behind the head. You can take the opposing hand and move it back behind your head to support the weight while waiting to begin. Be careful to keep the arm motionless and just bend the elbow slowly so that the weight is lifted until your arm is fully extended. Stop. Slowly return the weight to the position behind your head, then repeat.

If you are going to use the two handed, one dumbbell method, then make sure to place your hands flat against the dumbbell plates and keep them there as you extend and lower the weight. Oh, watch out that you don't hit your head with the weight.

French curls are another great exercise for the triceps. Lie on your back with a curved barbell in your hands. Extend your arms

straight out so that your hands are out in front of your head. Slowly allow the weight to carry your hands down toward your head. Here's the important part of this exercise: keep the elbows pointing straight ahead, toward your feet (when your elbows bow out, you diminish the effectiveness of this exercise). Once your hands (and the bar) get close to your forehead, push back up until your arms are fully extended out in front of you again.

After doing 10 repetitions of these kinds of curls, I like to do 10 chest presses immediately after with no rest. This really blows out my triceps big time! Do this complex exercise three times and you will feel the burn. Make sure your form is perfect and the weight is reasonable for you, otherwise you may be wasting energy trying to control it.

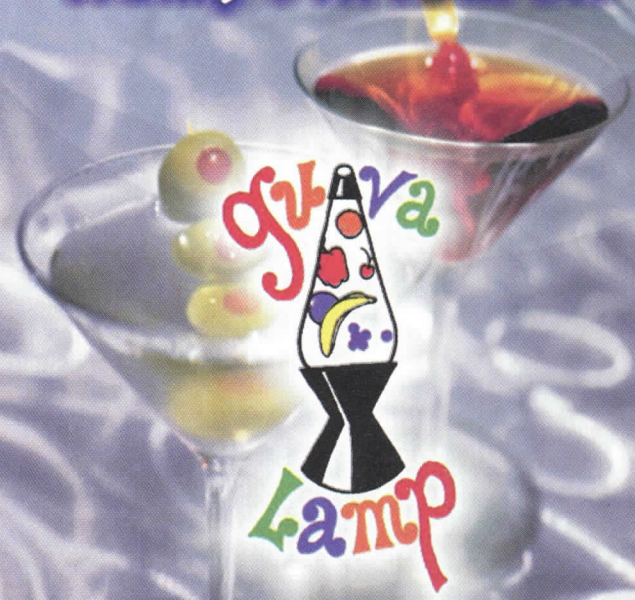

Many of these triceps exercises can be done standing, seated on the edge of a flat bench, lying on an incline, flat or decline bench. I've even seen guys doing these exercises kneeling on the gym floor. Whatever position "trips your trigger," remember — slow, careful, controlled movements and weight that you can handle easily are they keys to getting the most from these exercises. Slow and steady will always win the race here.

As always, I wish you the best in your quest for the best for yourself.

Guaranteed to jiggle your gay little beads. Hunnie!

About this time last year, I was ranting and raving about the new Kylie Minogue album, *Light Years*, that had just come out as an import. Not that I've been looking, but as of yet I still have not seen a stateside release of this, the best dance artist album of all time. I knew they would screw it all up for Kylie here in U.S. Damn them!

Anyhoo, thanks to a sweet, dear, ex-boyfriend who lives in Singapore who sent it, I now have to report that there is now a new Kylie album out as an import. It's called *Fever*, and it will give you exactly that. While it's not quite

the in-your-face offering that we saw in her previous album, it is quite a morsel. I just love the "Can't Get You Out of My Head" track that's currently blowing up in the clubs.

In all, there are 12 sensational new tracks from the diva of divas from Down Under on this album. And as I always say where Ms. Minogue is concerned, go ahead and spring for the import. I wouldn't hold my breath waiting for the U.S. to get it together for a release — unless blue just happens to be your color.

And that's the beats.
