sneeze all over the equipment and wipe off most anything you touch. When on the cardio equipment, try not to breathe all over the person next to you. And if you feel too tired or wiped out from the cold, stay home and chill out. One day off may just be the medicine you need to get healthy.

On the other hand, if you are exercising moderately on a daily basis, you probably will only suffer with a cold once during the year. That's far less than the three colds a year that most people experience. It's just another rea-

son for all of us to exercise daily, get plenty of sleep, stay away from cigarette smoking, drugs and excessive alcohol consumption. Yoga, meditation and other relaxation techniques are wonderful ways to ensure good physical health.

As always, I wish you the best in your quest for the best for yourself!

**Virgo (August 23-September 22)** Both the Sun and Mars are in your sign this week and form a rather uneasy alliance. Resist the urge to look before leaping. Take very little at face value. That New Moon on Friday finds you in a solitary frame of mind. Keep socializing to a minimum this week-end. Thoughtful friends pleasantly surprise you.

**Libra (September 23-October 22)** You're almost completely over that last love fiasco and it's time to get back into the dating scene, Libra. Splurge for a few new shirts with bright colors. Pay attention to a roommate's mood swings — he could be trying to tell you something. Prepare yourself for a marathon of career tasks on Monday.

**Scorpio (October 23-November 21)** Watch your spending right through to the month's end. There's not as much spare cash as you might think. Trust your intuition regarding a new co-worker. It's usually right on target. Try eating smaller meals to increase your energy level. News from back home answers an age-old question.

**Sagittarius (November 22-December 21)** You'll likely feel a little blue as the week starts out because it feels as if nothing is happening in your life. That feeling will change in a major fashion by Sunday night. Charge up those batteries for what looks to be a social whirlwind after the 8th. Experiment with a new haircut.

**Capricorn (December 22-January 19)** An old expression states that "busy is as busy does," so you definitely won't be lacking for things to do. Just don't deny your fun side in the process. Sleep patterns should be returning to normal soon. Carefully sift through Tuesday's mail. It may well contain a hidden golden nugget.

**Aquarius (January 20-February 18)** Your restless nature is likely to be in high gear all week long. Not much can be done but to keep busy and not worry so much about every little thing. A weekend getaway would work wonders for your peace of mind. It'll be a great excuse to ask that sweet Taurean to go with you. Go for it!

**Pisces (February 19-March 19)** New Moon on the 6th once again heightens the urge to find a mate. Instead of looking in the usual places, try a few new potential hangouts. A change of scenery often works wonders. Ideas come to you at a fast and furious pace on Wednesday. Make sure to write them down for future reference.

**Aries (March 20-April 19)** Aquarius isn't the only one with a restless itch that needs scratching. You've been as "nervous as a virgin at a prison rodeo," and some of that steam needs to be let off in a healthy manner. Power walking and swimming are two great forms of release. Of course there's a third — which we won't get into here.

**Taurus (April 20-May 20)** The week starts off beautifully with the Virgo Moon in effect and should remain that way until Monday night. The last three days will prove to be extremely hot and cold in nature. Watch your tongue on Wednesday in particular or it could cost you some cherished good will. Ambitions crystallize later in month.

**Gemini (May 21-June 21)** We're happy to say that finances are finally looking up for you, Gemini. Don't do any back flips just yet, though. You're still not out of the woods yet. Energy levels are likely to be a bit off on Sunday, so don't push the envelope until they rebound. Don't expect everyone to agree with you point-of-view.

**Cancer (June 22-July 22)** You're certainly bubbling over with enthusiasm, Cancer. Could there be a new love interest lurking in the shadows that you've been keeping a secret? Well, it's time to tell the world (or at least a few friends) about him. Put off making any career changes until the second week in October. Stay put for now.

**Leo (July 23-August 22)** Most of this week looks to be business as usual and relatively uneventful. If you don't look for surprises or excitement, it should turn out quite well. It's a good time to tie up loose ends and take care of all those annoying and much-dreaded chores. This is also a fine time to start that long planned diet.
