# The World's 3 Greatest Gay Magazines!

## QQ MAGAZINE For Gay Guys

QQ MAGAZINE is the flagship of our company. Now in its tenth year it has never missed a publication date—and is read by more than 95,000 gay guys the world over. It is a quality publication that is imitated by others but never duplicated. Every issue is packed with more than 20 comprehensive articles on all subjects of interest to gay guys—particularly matters pertaining to our sex. And there are the greatest photos found anywhere—of rugged men in single and dual poses (nude, of course!), plus a regular feature on professional musclemen and the contests they participate in (we tell you where to find the b-i-g guys!), plus a really heavy 16-page bonus section of hundreds of Personal Ads . . . free placement for subscribers—and free for those who respond (we do not charge for forwarding letters, as all others do!). Full magazine size printed on heavy enameled stock with color front and back covers and hot centerspread. Published bi-monthly. Magazines are sent in plainly-marked, extra-heavy manila envelopes that are carefully sealed to insure privacy. Sorry, cannot be sold to minors. One-year subscription (6 bi-monthly issues): \$15.00 in the U.S.A.; \$21.00 in Canada and Mexico; \$25.00 all other countries.

## The Male Pictorial BODY

BODY is a handsome pictorial dedicated to male beauty. Only in BODY will you find the ideal male—more than 50 beautiful models in every issue ranging in type from heavily muscled to rugged to lithe swimmer to sensitive young men. What every model has in common is a big phallus, firm buttocks, and beautiful face. Over 75 photos in every magazine—mostly full-page. Single, dual, and group poses. Plus a big 16-page bonus section of hundreds of Personal Ads! It's the only magazine of its kind that comes out on a regular basis. Full magazine size printed on heavy enameled stock, with color front and back covers and b-i-g centerspread. Published bi-monthly. Magazines are sent in plainly-marked, extra-heavy manila envelopes (so costly only Wall Street firms use them) which are carefully sealed to insure privacy. Sorry, cannot be sold to minors. One-year subscription (6 bi-monthly issues); \$15.00 in the U.S.A.; \$21.00 in Mexico and Canada; \$25.00 all other countries.

## CIAO! The World of Gay Travel

CIAO! is the only magazine of its kind in the world—dedicated to Gay Travel. In every issue you will find about 20 detailed articles on all the places you've ever wanted to visit. We show you what it's like and where to do it. Complete listings too—names, addresses, and descriptive comments. Guaranteed accurate (we check listings as late as 2 weeks prior to publication). Photos of bars, baths, streets, beaches, and even maps to show you what you've been missing—and what to look for when you get there. As exciting for armchair travelers as guys planning their trips. Plus a monthly photo feature and picture gallery of international studs—to forever end the argument of where the b-i-g ones are. World news and dining tips too. And a gay comic strip. Plus a big 16-page bonus section of hundreds of Personal Ads! Printed on heavy enameled stock. Mailed to subscribers in plainly-marked, extra-heavy manila envelopes which are carefully sealed. Cannot be sold to minors. One-year subscription (6 bi-monthly issues): \$15.00 in the U.S.A.; \$21.00 in Canada and Mexico; \$25.00 all other countries.

## Gender Bender A New Gayology?

By Roger Watson

EVER since Onan hung five around his cock and 'spilled his seed upon the ground' -ologists dealing with every aspect of sexual relationship have tried to find out why.

What turned Onan into a sexual renegade? Was he so bored with the old "a-one-an'-a-two" and absolute *must* of Hasidic cunt-life that he found the fist more fascinating than the fuck? Or was he also the first fantasexist, using his fist as a sex-connection between erotic desire and the humpy numbers who appeared in his dreams? Was Onan well on his way to becoming *Homo Numero Uno*?

We shall never know, of course, since the Hasideans also got their rocks off in a unique way—they stoned Onan to death for 'conduct unbecoming'. Enough of the Onan puzzle has remained, however, to provide unending grist for the mills of biologists, theologists, psychologists, sexologists, psychiatrists, sex analysts (Kinsey/Masters and Johnson), and such hellfire 'n brimstone sex Bibliobores as Bryant (Anita) and Graham (the Rev. Billy).

In Onan's time sex and gender (considered one and the same) was positively male or positively female. And it was as cold-turkey as a biopsy report or a thumping of the uterus, by which it is determined that one can't have "just a touch of cancer" or be "a little pregnant." Sexual behavior was strictly male-to-female, and no shillyshallying about Mr. In-Between. Onan, of course, must have thought this wrongheaded. Although no psychologist—and with a macho reputation of being the ruttingest rutter in Hasidic circles—he must have enjoyed fantasexing male-to-male, spilling all that tasty cum defiantly on the ground. Very likely he was our first gay rebel.

Centuries passed before civilization came to realize that the maleness or femaleness of an individual (Continued on page 30)

## The Art Of Successful Sex

Walter Norris

ORAL sex is more difficult to bring off artfully anal sex because every cock has its own personality and must be approached in a more individual way. Simplistically said, in anal sex a hole is a hole is a hole, and once past the pain-threshold of first-time entry—and one discovers how to relax the anal sphincter muscle for next-time ease—there is nothing very complicated about it. Other than deciding on which position is preferable, it's mostly just enjoy, enjoy and *enjoy!*

Thickness and length of cock which, in anal sex, are more or less taken in stride (if you'll excuse the expression) are always the first-confrontable problems in oral sex. Even for those who are quite experienced, 'what to do' about size can tax the wits. Add to that the fact of foreskin—or lack of it—and perhaps some unusual cock-configuration (does it bend to the right/sashay to the left/arch stiffly to High Noon?), and it is at once clear that to plan sucking strategy to make it enjoyable for each other is indeed a fine art.

Every art has certain basic principles and techniques that make it possible for it to communicate and grow. So has sucking. However elementary these techniques appear to be (too many gay guys just take sucking for granted . . . trusting that 'doin' what comes naturally' will be okay), if one is not in command of them, using them *knowledgably* whenever they should be applied, the whole sucking scene can disintegrate into a disappointing pullout. Don't expect encores! The day has long since passed when sucking just 'any old way' was acceptable. Today, with so much sex available, and with so many having turn-on-a-dime sucking skills to offer, the old 'easy come, easy go' has come and gone. Artful sucking is *in*—and it's highly competitive—and you'll do just fine if you know

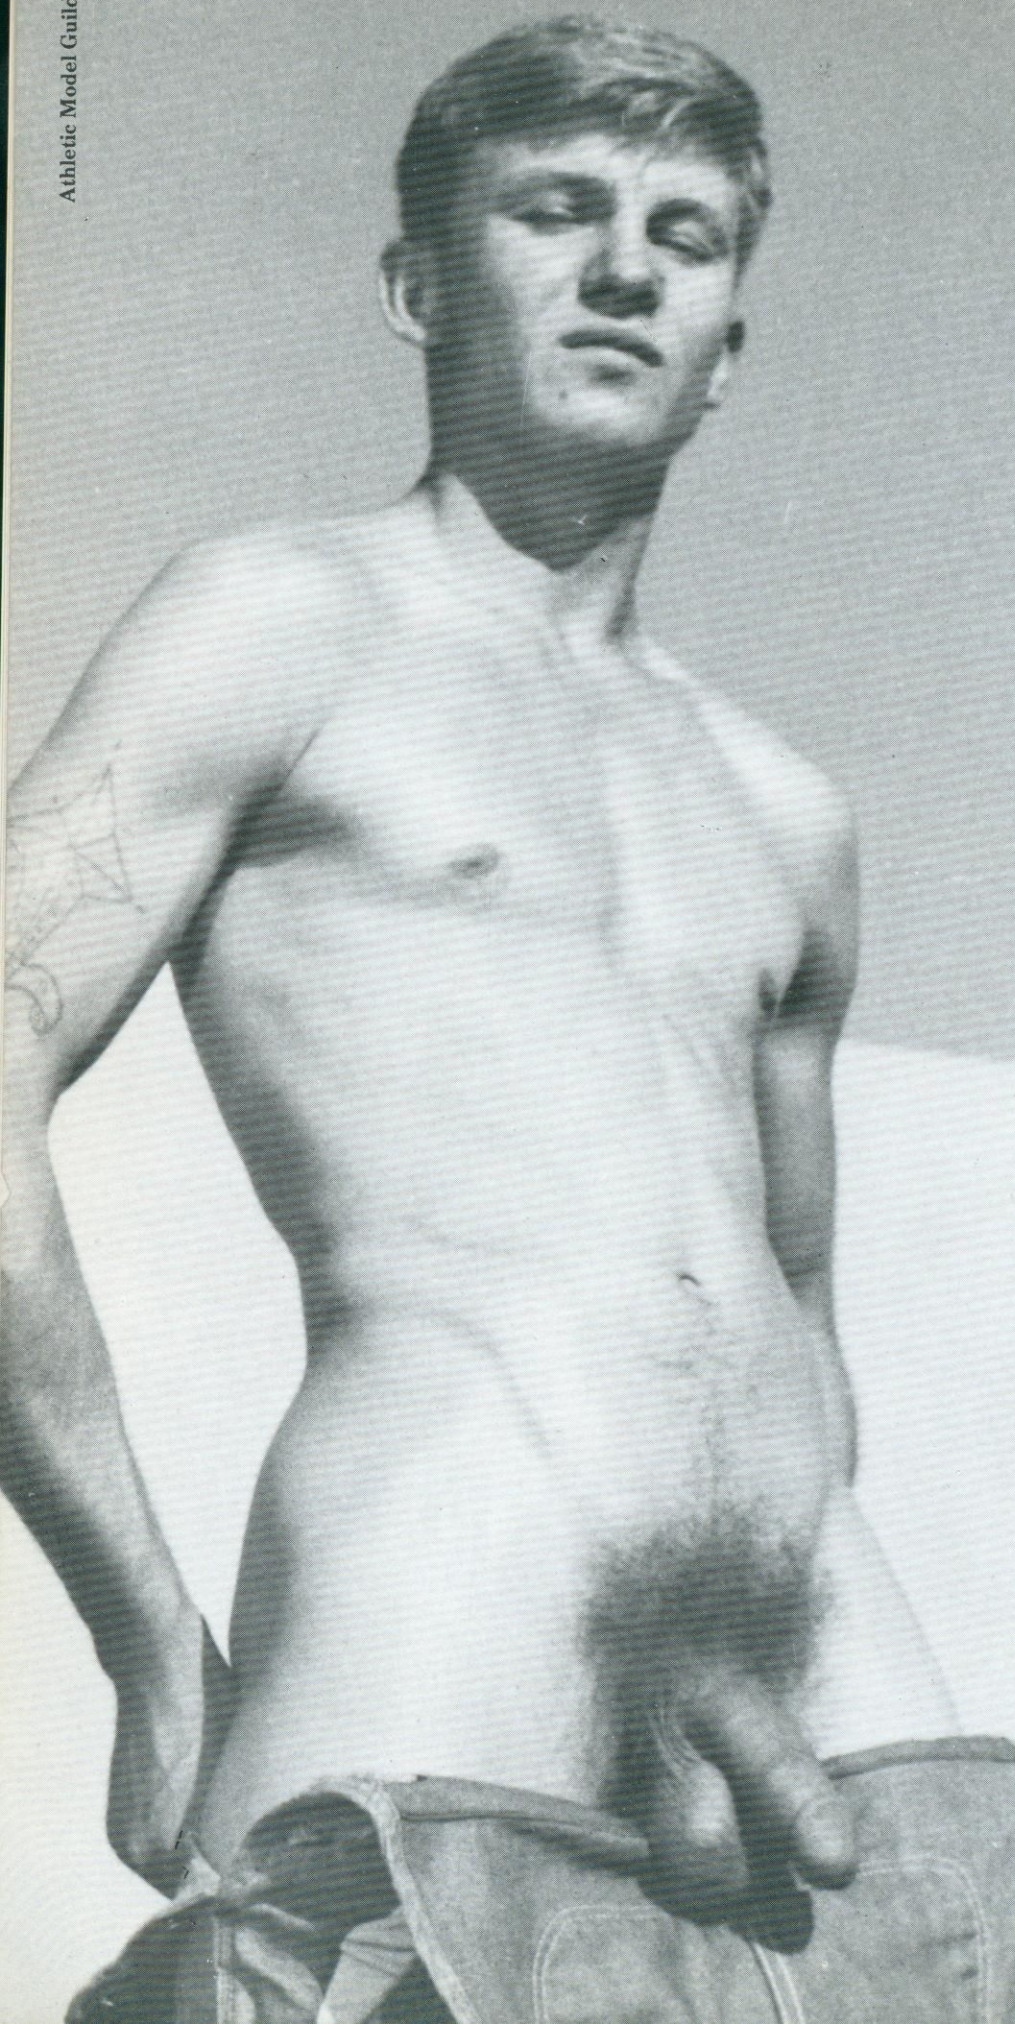

### THE ELEVEN BASICS OF GREAT SUCKING

1. *Lips-control*. Lips-pressure is essential to every moment of sucking—from the instant of cock entry into the mouth, to the point of withdrawal after orgasm. Lips should be so practiced in pressure control that they seem to have a mind of their own. There should always be a *flexible tautness* of the lips to make it easy to 'swivel' from one style, variation or position to another, without losing the *sense of erotic contact* that makes great sucking a seamless operation.

Please note the term '*flexible tautness*'. Don't think 'rigid' for 'taut'. If the lips are too tensed this will (a) inhibit the mouth, not allowing it to fully accept the cock (especially if it is of a good thickness); (b) too-tight lips place a blade-like tension on the cock—causing one's partner to immediately feel apprehensive, uncomfortable and doubtful about the progress of the scene; and (c) too much tenseness of the lips causes a corresponding tenseness of the tongue. Thus the tongue, which should lower easily as the cock enters, and raise as it leaves, is turned into a kind of sword. You'll know by the reaction of your partner whether the degree of lips/tongue tension you apply is satisfactory.

Perhaps the best way to achieve the proper degree of lips-tautness is simply to think of them covering/

masking the teeth as the cock enters. If you will make sure there's enough lip skin to cover the edges of the teeth during sucking, almost everything else falls into place. Naturally, for one with an overbite—quite long or protruding teeth—even greater care must be taken to cover them. A good way to do this is to practice on dildos of various sizes. Also, the very 'toothy' individual may find it helpful to massage a little oil or lotion into his lips two or three times a day. Massage gently, however; don't make such a production out of it that you pull the lips out of natural contour . . . they shouldn't look like misplaced foreskin.

2. *Mouth moisturization.* Salivate, salivate, *salivate!* No cock feels comfortable in a parched mouth. "Hard-rockin' it" is a Southern expression for this too-dry condition. The cock feels as if it's plowing the south forty. Where the too-rigid tongue seems to almost lacerate the cock, a too-dry mouth (and lips) are abrasive—causing discomfort not only to one's partner, but to oneself.

Conversely, if you get too juicy you can lose tautness, and lose necessary friction that keeps the cock excited.

Generally, the right amount of saliva is produced if one will just think of a frosty glass of orange juice (forgive us, Anita!). It's rather like someone who can't force urine just by willing himself to do so—or by muscularly forcing it—but can piss up a storm the moment he hears a water-tap turned on. The suggestion/connotation is what does the trick. Psychologically, the mental picture of the tasty glass of juice is enough to physiologically start the 'tap' of salivation.

It's also helpful to drink several glasses of water or juice each day. This builds a reservoir of moisture for saliva when it's needed. If you have your partner at home, keep a glass of a favorite liqueur or cordial nearby. Sip it at sneaky intervals to trigger salivation (such as when changing positions).

3. *Sucking speed.* How fast/how slow? An SPM (strokes per minute) of about 60 will be about

QQ

right. More—and he may figure he has Woody Woodpecker on his cock. Fewer—and he may conclude that you're having to work too hard on him. This can be defeating to his spirit and deflating to his cock. But if he says he likes it "slow 'n easy" give it to him at about 30 SPM.

Obviously the thickness of the cock has much to do with the speed of sucking. If it's quite thick and your mouth is spread too wide for too long you can work yourself into a frazzul trying to whack out 60 SPM. So as a 'rule of tongue' you might figure that 'the thinner the cock, the faster the suck'.

Also, if it's quite long and thin, a revved-up speed is essential since you'll want to bring him to orgasm as quickly as possible because you can't scale-down your lips-pressure (embouchure) and keep a grip on it for very long.

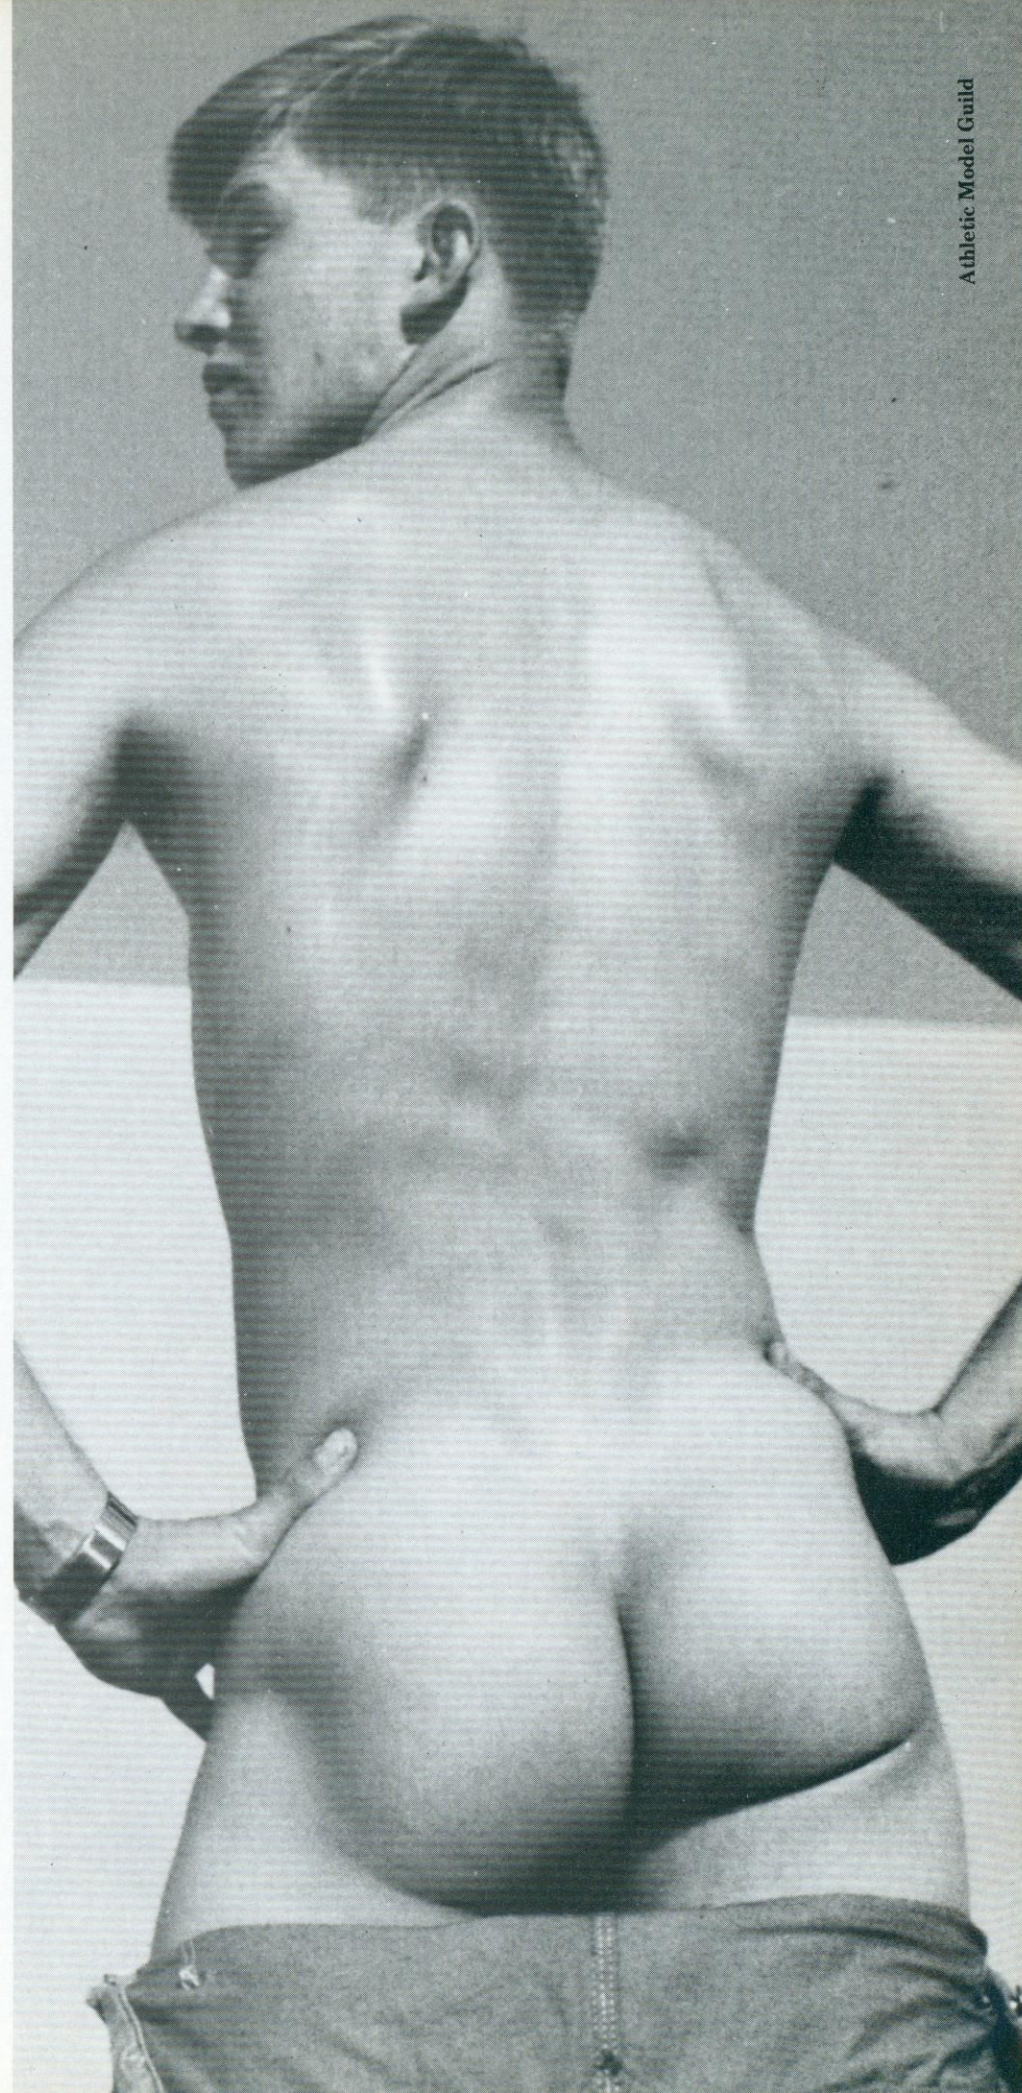

In other words, it's just the opposite of stretching the *mouth* too wide for too long at a time to accommodate a Whopper King.

You can usually tell from his response whether he wants it faster (he'll likely start to masturbate the lower part of his cock at a faster speed than your suck . . . and this can be upsetting because of the out-of-sync rhythms).

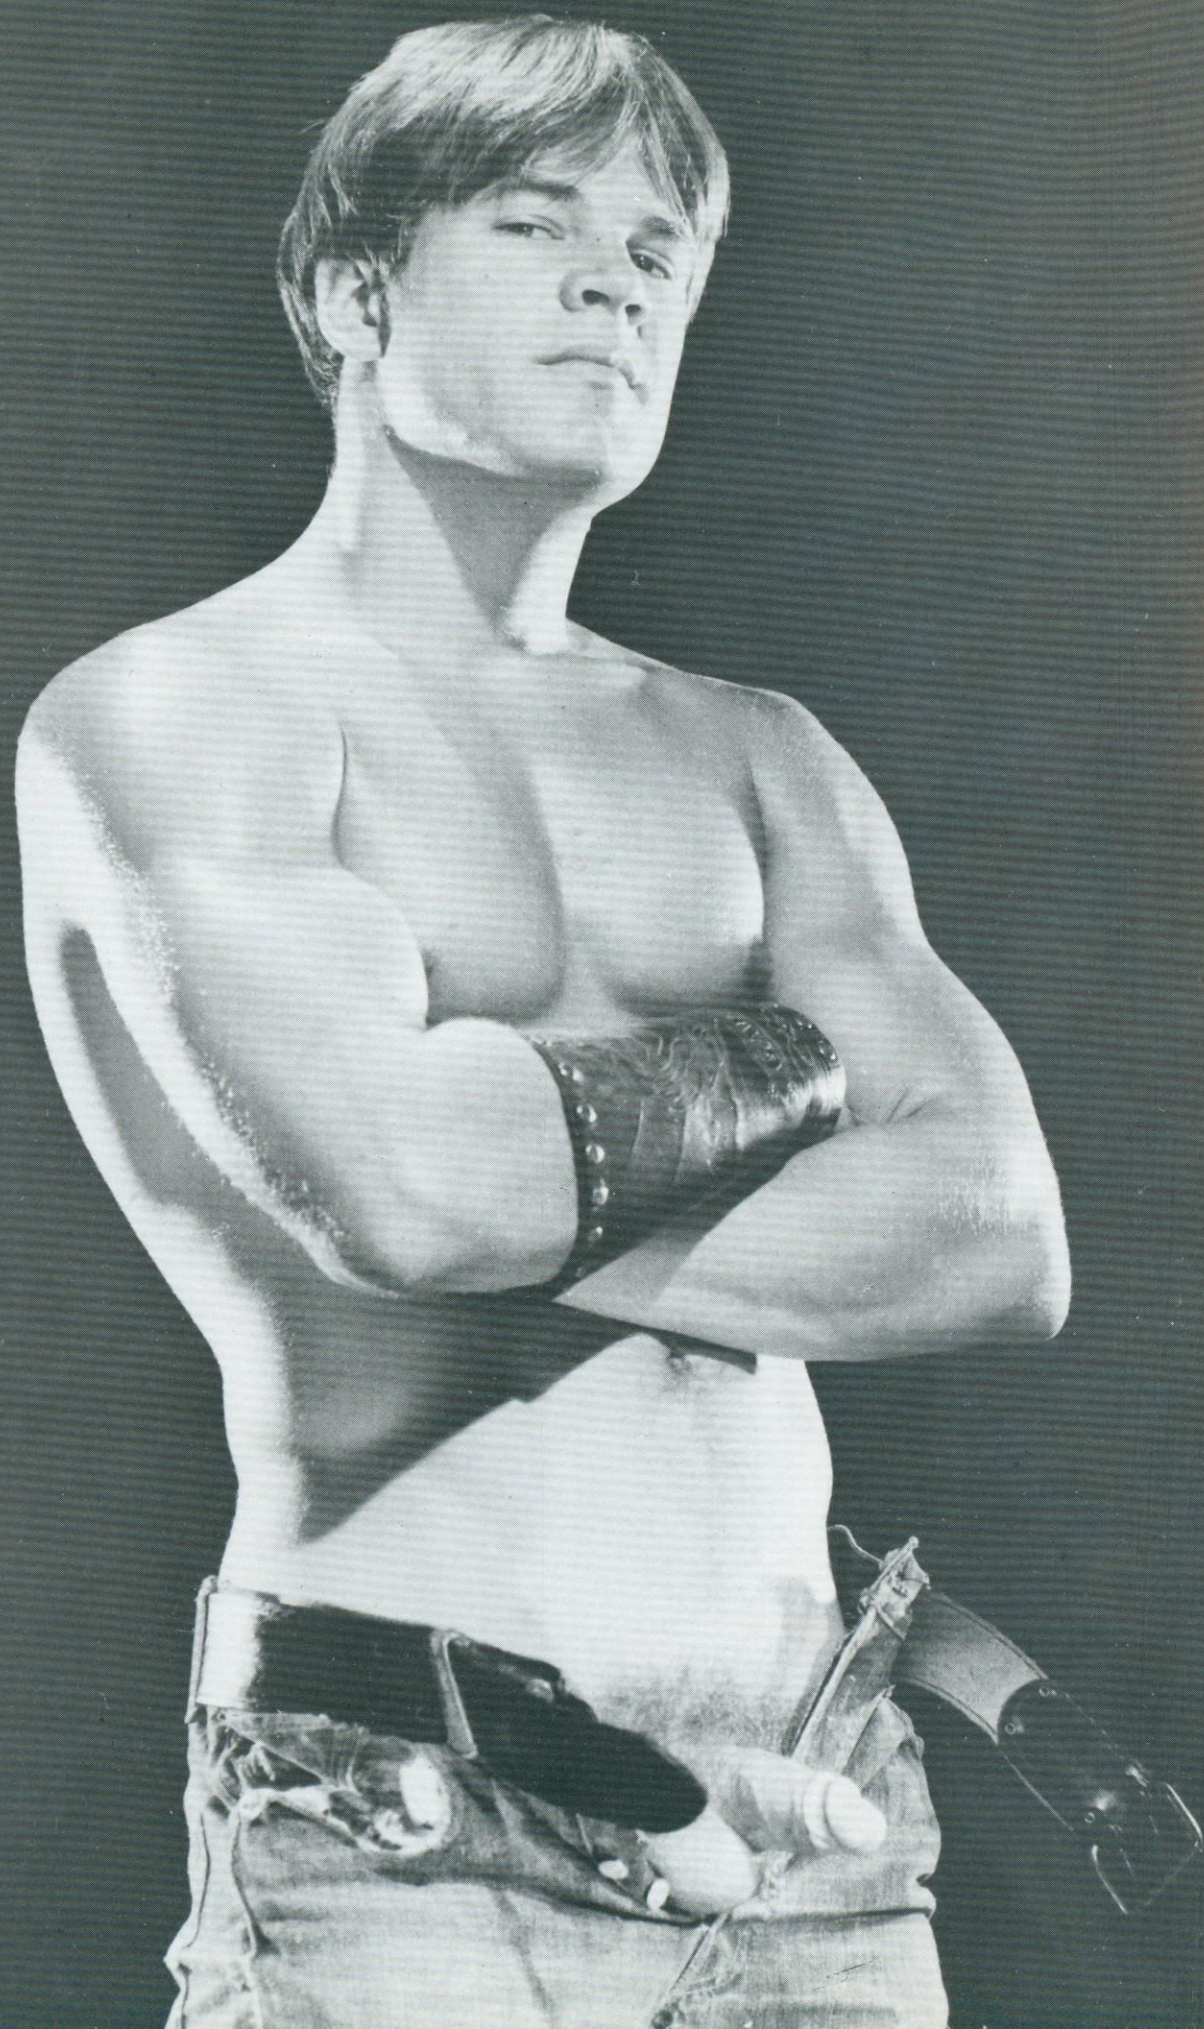

Also, it *can* be a way of telling you he'd like to get the whole damned thing over with as quickly as possible. But after having lain passive as he seemed to enjoy your efforts, if he suddenly begins to masturbate in your mouth at a faster or lower speed, then assume that speed. If he simmers down and lies back contentedly again, you'll know that was the message. Otherwise, don't try to fathom his meaning. It's probably the he is finding it something of a disappointment. Perhaps he expected something kinkier. There can be a dozen reasons. Why belabor yourself wondering which it may be?

Your partner, moreover, may sometimes press gently and rhythmically on the back of your neck as you suck. This usually indicates that he's enjoying it, but would enjoy it more if you'd slow down a bit. His message will be all the clearer if he lightly presses *and* strokes your neck. Or he may gently (Continued on page 47)

# THE HEMINGWAY ENIGMA

## MACHO MASQUERADE

### BY SCOTT YOUNG

**W**HEN Ernest Hemingway pulled the trigger that ended his life in 1961 there were those who may have felt it to be a symbolic act of sodomy—that the long fuse of his sexual stress tolerance had burned down to the nub, and that with the implosion of the bullet he'd finally got the fuck he'd always wanted—but never could have admitted to—for 63 years.

"Papa clung to his macho image like a Roman senator hiding his shortcomings under his toga," some said. "His exaggerated two-fisted masculinity was brandished to the point of caricature; it was his trademark, like Errol Flynn's movie swordplay, but without Flynn's tongue-in-cheeky grace and charm." Others thought it mostly bluster. "He faked a machismo he didn't have, and wasn't a good enough actor to keep it up . . . there were glaring lapses—particularly near the end."

And some will say that, like von Aschenbach in *Death in Venice*, "There is a Tadzio who comes along in the life of every man and when Hemingway recognized him it was too late to do anything about it. Moreover, as one of dominant heterosexuality (he had been married four times, and was a father), he might not have known how to handle the situation. Perhaps near the end—in one blinding "moment of truth" . . . the phrase he minted—he may have perceived his macho masquerade as the pitiful posture others saw or suspected it to be. With his own secure world suddenly shattered he may have fallen victim to schizophrenia, in which event the gunshot was really his own *coup de grace*."

#### HEMINGWAY AND STEIN/TOKLAS

Alice B. Toklas seems to have been the first to sense sham in Hemingway's public machismo. In the several writings about her she appears to have been concerned about this—especially as it affected her lover, Gertrude Stein. Gay people, of course, have a sixth sense about fraud—however gentle it may be—and Hemingway puzzled Toklas. She often expressed her opinion of him to Gertrude during Hemingway's Paris period when he and his wife were frequent guests, and Gertrude acted as his advisor and sponsor.

Gertrude Stein would have been the Lady Luck of March/April 1978

any '49er . . . she knew precisely where to strike gold. She had helped and sponsored Picasso, Braque, Matisse and Scott Fitzgerald—among others now famous and treasured—and considering Gertrude's uncanny instinct for the genuine, Alice felt that she should have seen through Hemingway in an instant. Yet Gertrude defended him: "He cares for his craft, and one day will be the best." At that time Hemingway was a foreign correspondent for a chain of Canadian newspapers and was not deeply involved in creative writing. His conversations with Gertrude proved to be the turning-point: she provided just the encouragement he needed, and those who value Hemingway's writing also have her to thank.

Toklas, however, thought it a betrayal of logic that one who could express such aversion to homosexuality—with his insistent he-manliness always on parade—was at the same time at his most comfortable among homosexuals. As a regular guest at Gertrude's 'evenings' he was in almost daily contact with the creative gay people of Paris. This led Alice to suspect that somewhere inside the man was a strain of homosexuality which would surface in time—and perhaps with results disastrous to him.

Yet as the years passed, and with Hemingway growing gorier with each successive bullfight and wild animal shooting . . . being depicted as the epitome of all the 'manly virtues' schoolboys should emulate . . . the Toklas suspicions/predictions appeared groundless. It cannot be denied that Hemingway's super-maleness made a strong impact on youth through the almost serial-like frequency of his blood 'n guts works. He was omnipresent, and that can be risky. As variety performers used to warn one another: "Don't stay onstage too long."

#### AN OUTMODED MACHISMO

To others Hemingway had already become a bit of a bore. As one critic noted, with gentle restraint: "All those pictures of Hemingway unleashing his 'manhood' are somehow yellowing with age." To an incoming era, in which role-changing was to be commonly accepted, and in which things once considered 'feminine' were to become interweavably 'masculine' (beads, bracelets, necklaces, long hair-

styles), Hemingway's brand of machismo was growing outmoded.

Yet he seemed to be unfazed by all this—growing more macho as he grew older. This inevitably led to some asking whether he was perhaps over-compensating for a latent homosexuality; or beefing-up his machismo still more to cover possible impotence; or, in short, wasn't he just a bit much? Why did he continue trying to top himself?

An actor—even a great one—who begins to 'milk' his audience for applause soon finds that he is being offered only secondary roles. Burlesque would dub him 'second banana'. In ballet he would be a *demi-caractere* dancer—usually small, quick and clever—sent onstage for a brief diversion between principal scenes. In the circus they "send in the clowns." Hemingway, therefore, was becoming a *minor* conversation piece—and of a far different connotation.

Of course, this finally got to him—and inside him—although he did not reflect it outwardly. But it began to show in his writing which—in an odd way—seemed to caricature his now-caricatured image . . . chipping, chipping away at it. Who can guess the depth of his torment? The downfall of a great egocentric is not a pretty sight. Could it have caused schizophrenia? And could a 'Tadzio' have appeared at this point to make his obsolescence that more unbearable—because to have responded would have been all the more pitiful? Probably we shall never know, because Hemingway, although always playing 'full out' for the public, was a very private individual. Even his personal letters are interdicted: *Not To Be Published*. Or 'Eyes Only' in White House parlance.

Incidentally, this is pointed up in the *New York Post* of October 3, 1977, in an Associated Press release from Detroit: *An Ernest Hemingway love letter, written by flashlight during World War II and ordered never to be published, has been auctioned for \$3400. The four-page handwritten letter was sent to Hemingway's future wife Mary from northern France where Hemingway was a war correspondent for Collier's magazine, she said. Mrs. Hemingway donated the letter to the Detroit Public Library for the auction, which was held to raise funds for the library. In keeping with Hemingway's will regarding his private letters, the donation stipulated that the buyer, who was not identified, never publish the letter.*

The reasoning seems specious . . . for if for one eye, why not two?

#### THE UNPUBLISHED HEMINGWAY

The public image of the private Hemingway will likely be changed somewhat, however, by the discovery of some uncompleted, and some completed—but unpublished—novels, which will be part of the collection of the John F. Kennedy Library in Massachusetts, when it is completed. Presently they are stored in the Federal Archives and Records Center in Waltham, and the word is that in at least three of the novels Hemingway's latent homosexuality had begun to surface even in the late 1940s—from the initial point of simple curiosity about it,

then finally recognizing it as a force to be reckoned with, and trying to come to grips with it.

Of special interest is a report in *The New York Times Magazine* of October 16, 1977 in which some rather guarded information tells of one such uncompleted novel—*Jimmy Crane*—of 20 handwritten chapters. Apparently Hemingway—his curiosity about homosexuality finally aroused—was unable to complete the novel because of his lack of previous homosexual response. Consider this revealing opening line of the first chapter: "My Father touched me and I was wide awake." (It should be mentioned that other than a brief critic's perusal of bits and pieces of these unpublished novels no one has been permitted to read them in full. Yet on the basis of what has been read, the curiosity about/concern with Hemingway and homosexuality is unmistakable.)

As the report further discloses, in another unpublished story entitled *Crime and Punishment* Hemingway seems to have evolved to the point where he has actually become compassionate with homosexuals (quite a switch from his initial aversion). Quoting the *Times*: The story takes the form of a conversation between a young narrator and old, beached sailor. While the two are hiding beside a railroad track waiting for a freight train, the sailor tells about a homosexual rape:

"They gave me 20 years," he said, "for fixing (fucking) a punk."

"No," I said.

"Yes. Twenty years . . . There was two of us and the Master at Arms found us. He was the one that charged us . . . They shifted the kid to another ship. After a while the Master at Arms was transferred too . . . Then a lad that had been in our ship caught them . . ."

At the end of the story the narrator politely turns down a proposition.

But it is in a completed, and as yet unpublished novel entitled *Garden of Eden* that Hemingway reveals his fascination with the woman in man, and the man in woman, and we can understand the alpha-and-omega curve in his homosexual perception . . . how it was there from the beginning—at first unrecognized, then stifled by his insistent machismo throughout his life, only to surface at the end.

It should be remembered that Hemingway was born in 1898—at a time before the invention of the candid camera, when it was a middle-class family tradition to visit a local photographer and have formal photographs of children made during their first years of childhood. This was always a dress-up occasion and boys up to the age of two were invariably photographed in long white dresses (just as their sisters . . . and it should be mentioned that even at that age mothers were so distressed by the thought of the 'first haircut' that boys wore long finger curls). Thus Hemingway and his sister looked almost identical in photographs. A child psychologist today would throw up his hands in horror at the implications of this—as well he should.

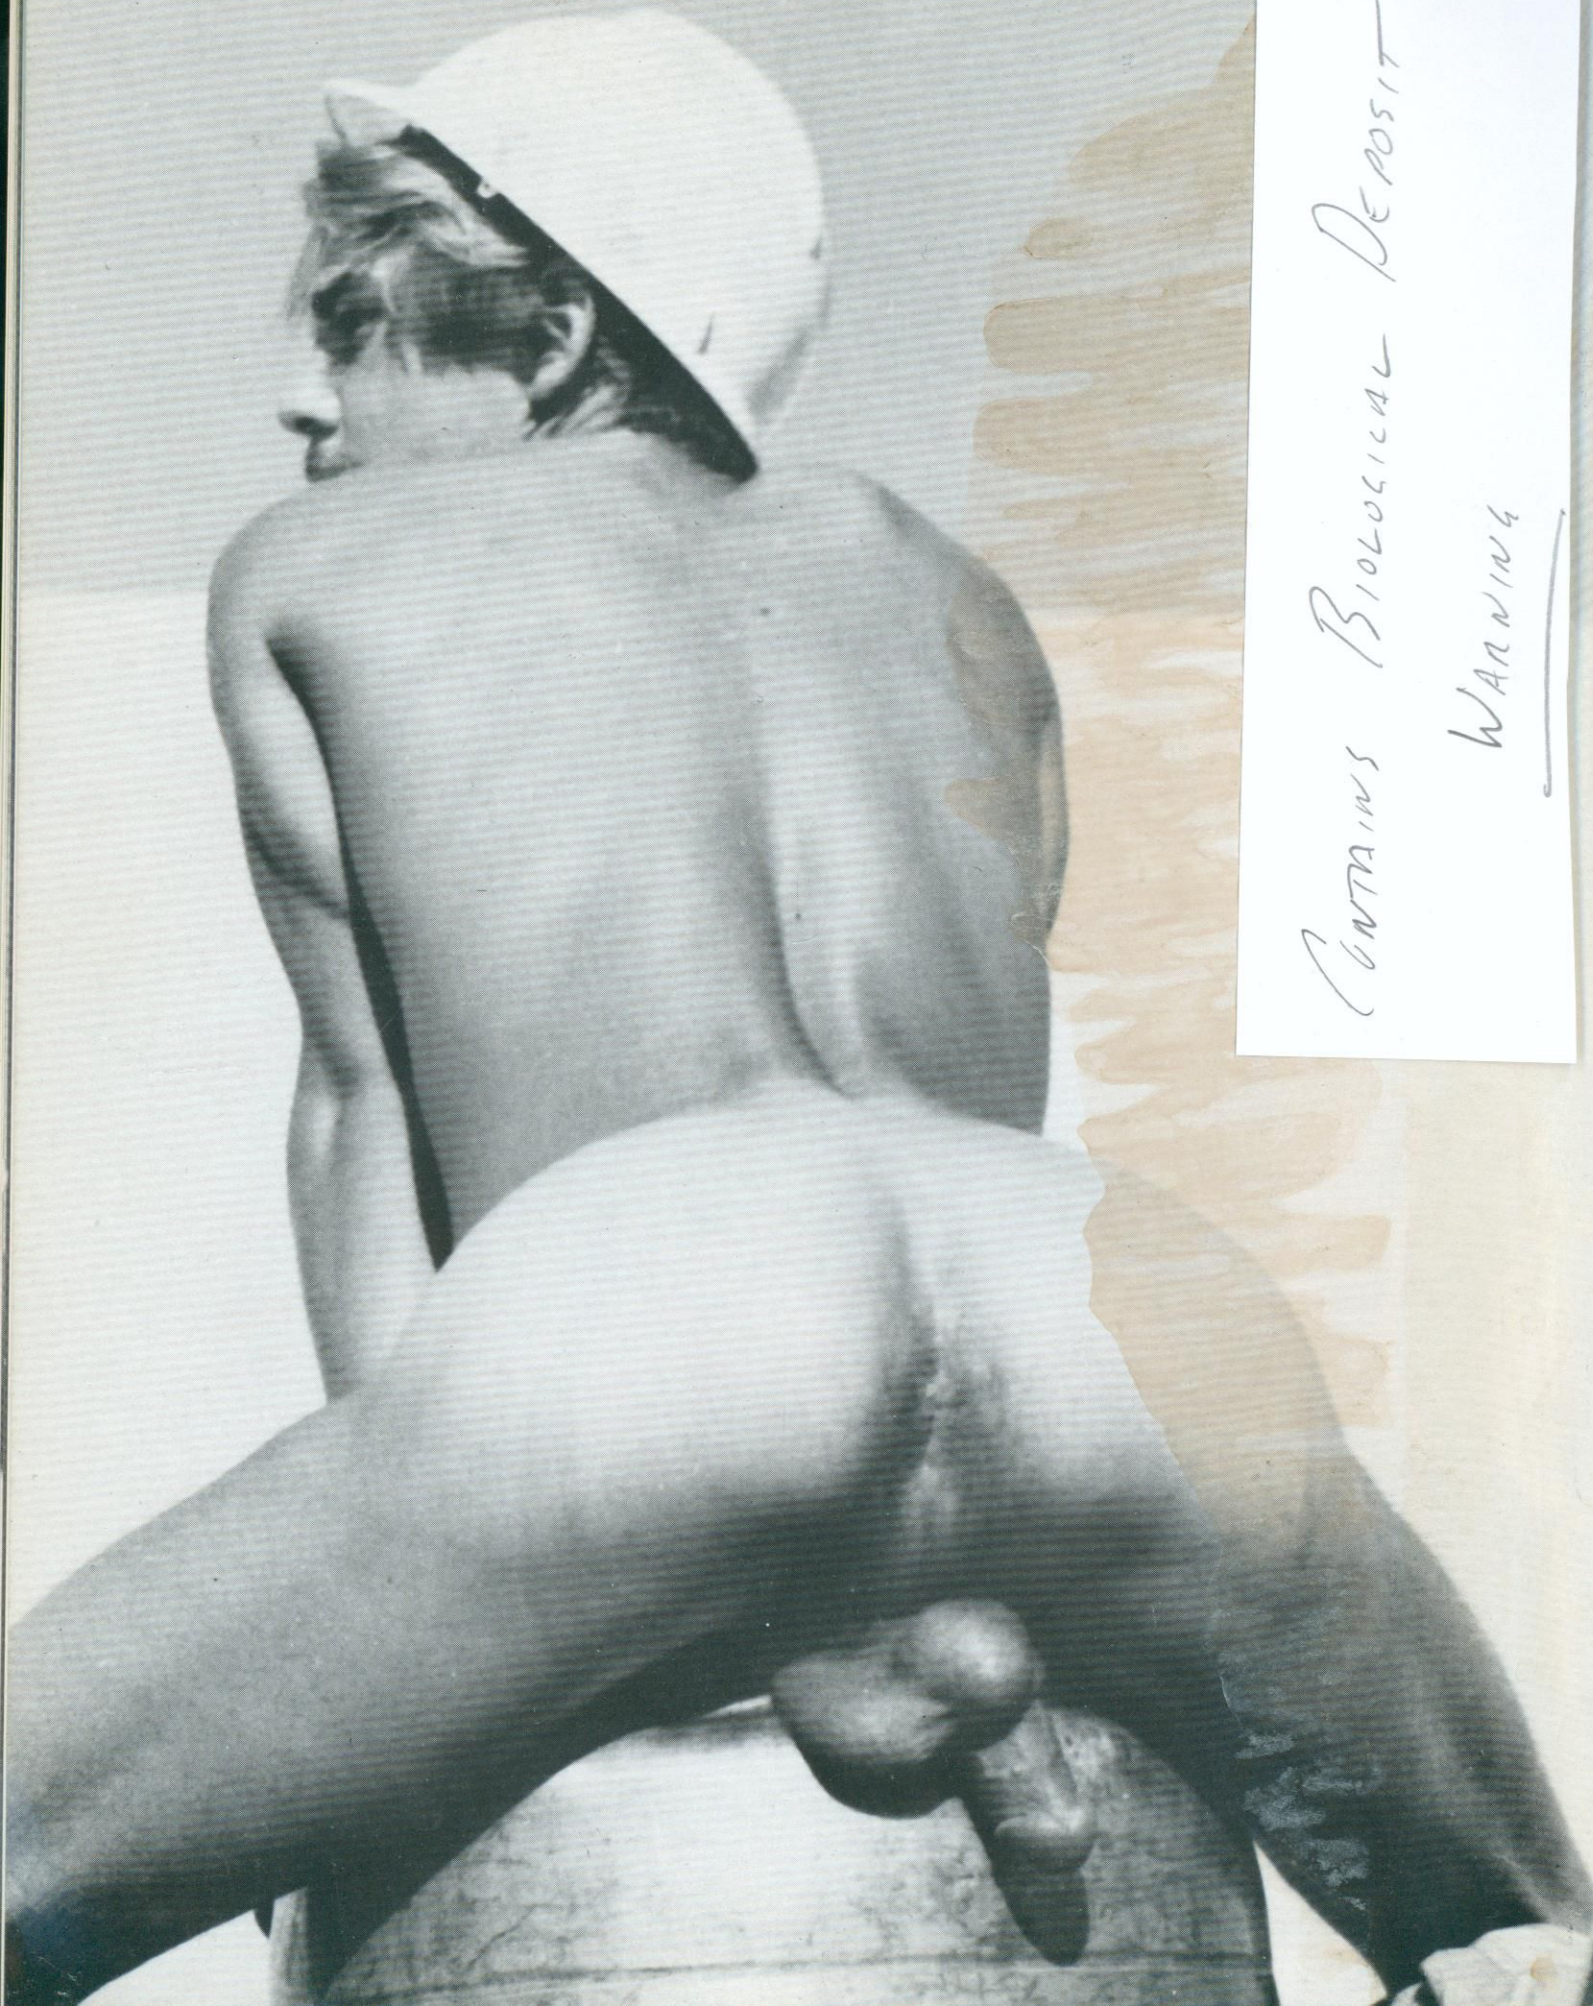

It is therefore no wonder that Hemingway developed even a

## A Loss Of Sexual Desire

# Fiberglass Ass

By Don Ellis

OF the many gay people who saw the film *Looking for Mr. Goodbar* some must have empathized with Terry Dunn, the flippable, misused heroine who could so easily be brought to Quickie O by others, but couldn't get it on with the man who truly loved her. It's a ruefully funny film with a poignant message for gay guys at this point when the "new sexual revolution" has burst at the seams and we're wallowing in the stuff.

What the picture points up is an odd shift in sexual relevance, in which the all-important element of *desire* is impeded by a *too-muchness* that falls victim to *auto-monotony*. Only a short time ago a sex encounter was not so easily contrived, and one tended to make more of a thing about it—an event. During the encounter, therefore, we had time to get acquainted . . . we could explore and marvel at each other's body—achieving a wilder crescendo of sensitized response as we pulled out trick after trick from our bag of erotica. Because each experience had its own unique character and flavor it was something to be treasured. When the memory of it popped up in the mind, even years later, one recalled it vividly in detail . . . with a smile of delight.

### SEXUAL DISTORTION

Now, however, we seem to be looking through the other end of the sexual telescope, perceiving sex as a surging sea around us. While this is a happy turn of events, there's just so much of it—and so easily available—one feels out of step with the times—even churlish—in turning down any trick. We rarely have time to say more than howdy . . . get on, into, and off with it.

With no chance to discover myriad wonders in the body of another, sex tends to become just so much 'fiberglass ass'. Like the filaments of glass woven into yarn as insulators and heavier-duty stabilizers, fiberglass ass is sex *insulated from desire*, and thus stabilized for the merry-go-round of constant use. Without emotion/desire, sex is more function than fun, and the more often the cock is whipped out in response to the immense availability/invitation of sex, little of it—and those we chanced upon—will be remembered.

No denigration of those who play the 'numbers March/April 1978

game' is implied. There is no lack of desire in those who are devotees of fast john-cruising, for example. Here, desire is eroticism felt in a different way. The element of *challenge* prevents any auto-monotony, thus this kind of sex remains creatively viable.

With our greater sexual activity, one should remember that the phallus is a wondrous instrument for giving and receiving pleasure, and that its mystique has pervaded man's erotic thoughts ever since Eve threw away the apple for a go at Adam's tastycrack. *Treasuring* the phallus is, therefore, a legacy to us from all centuries.

It may be worth mentioning that in *Christian* (mind you!) Denmark of the twelfth century, the phallus was actually *ecclesiastically* revered. A huge, carved phallus was as liturgical as prayer beads, incense and candles. Smaller ones were carved on baptismal fonts. If Denmark is on your vacation itinerary, why not visit the beautiful Romanesque church at Tømmerby in northern Jutland to see its handsome phallus? It stands in a corner of the porch—is 4½ feet tall, and sculptured proportionately to nature. The *glans* is wholly natural; huge, dome-shaped, with a still-kissy hole. The *corona glandis*—the sexy rounded lower border of the head—is tongue-lickably carved. The upper shaft is richly rounded, while the lower part (at what would be the pubic bone) is octagonal and handsomely ornamented with the spiral tracery of the Romanesque style.

In most churches the phallus was placed at the front door, and was touched lovingly by the hand of the male and kissed by the female on entering the church. While at Tømmerby the phallus has been moved to various locations, it now rests in its original spot on the porch. As erotic sculpture it's worth making the side trip from Copenhagen to see. Say hello!

Because Denmark—like other Scandinavian countries—has always been so vitally homosexual, one surmises it was as much love of man-for-man (both warrior-to-warrior/guy-to-guy, and dream-swept Iago/Cassio types) as it was love for God that inspired these sculptures. In any case the church phallus was a turn-on that many found more soul-filling than the incense-thick liturgy inside. Sexual

desire—thrillingly felt—ignites the body more than any other emotion. The Danes of that time regarded these carved phalluses as ignition switches to joy, fruition, and as a linkage with pagan revels. The Danes of today obviously have never forgotten this. 'Fiberglas ass' is not their smør-gasbord!

#### WHY THE SUDDEN LOSS OF SEXUAL DESIRE?

1. *Trend-setting.* Many believe that a prime reason for the dearth of desire, in a plethora of phalluses, in a sea of sex, is that gay people—especially in the larger cities—are currently working so hard at being trend-setters in new enterprises they have less time for get-it-on sex. We shall explain this phenomenon as we continue.

2. *Frustration*—it has always put the whammy on sexual desire. Frustration over nagging new-business problems is still *frustration*; the end-effect of all frustration is the same . . . a curious diminution of sexual desire.

3. *Anxiety.* Concern over the possible failure of a new venture can be as sexually defeating as anxiety about the size of one's cock; sex performance; or one's body and looks . . . all the variables.

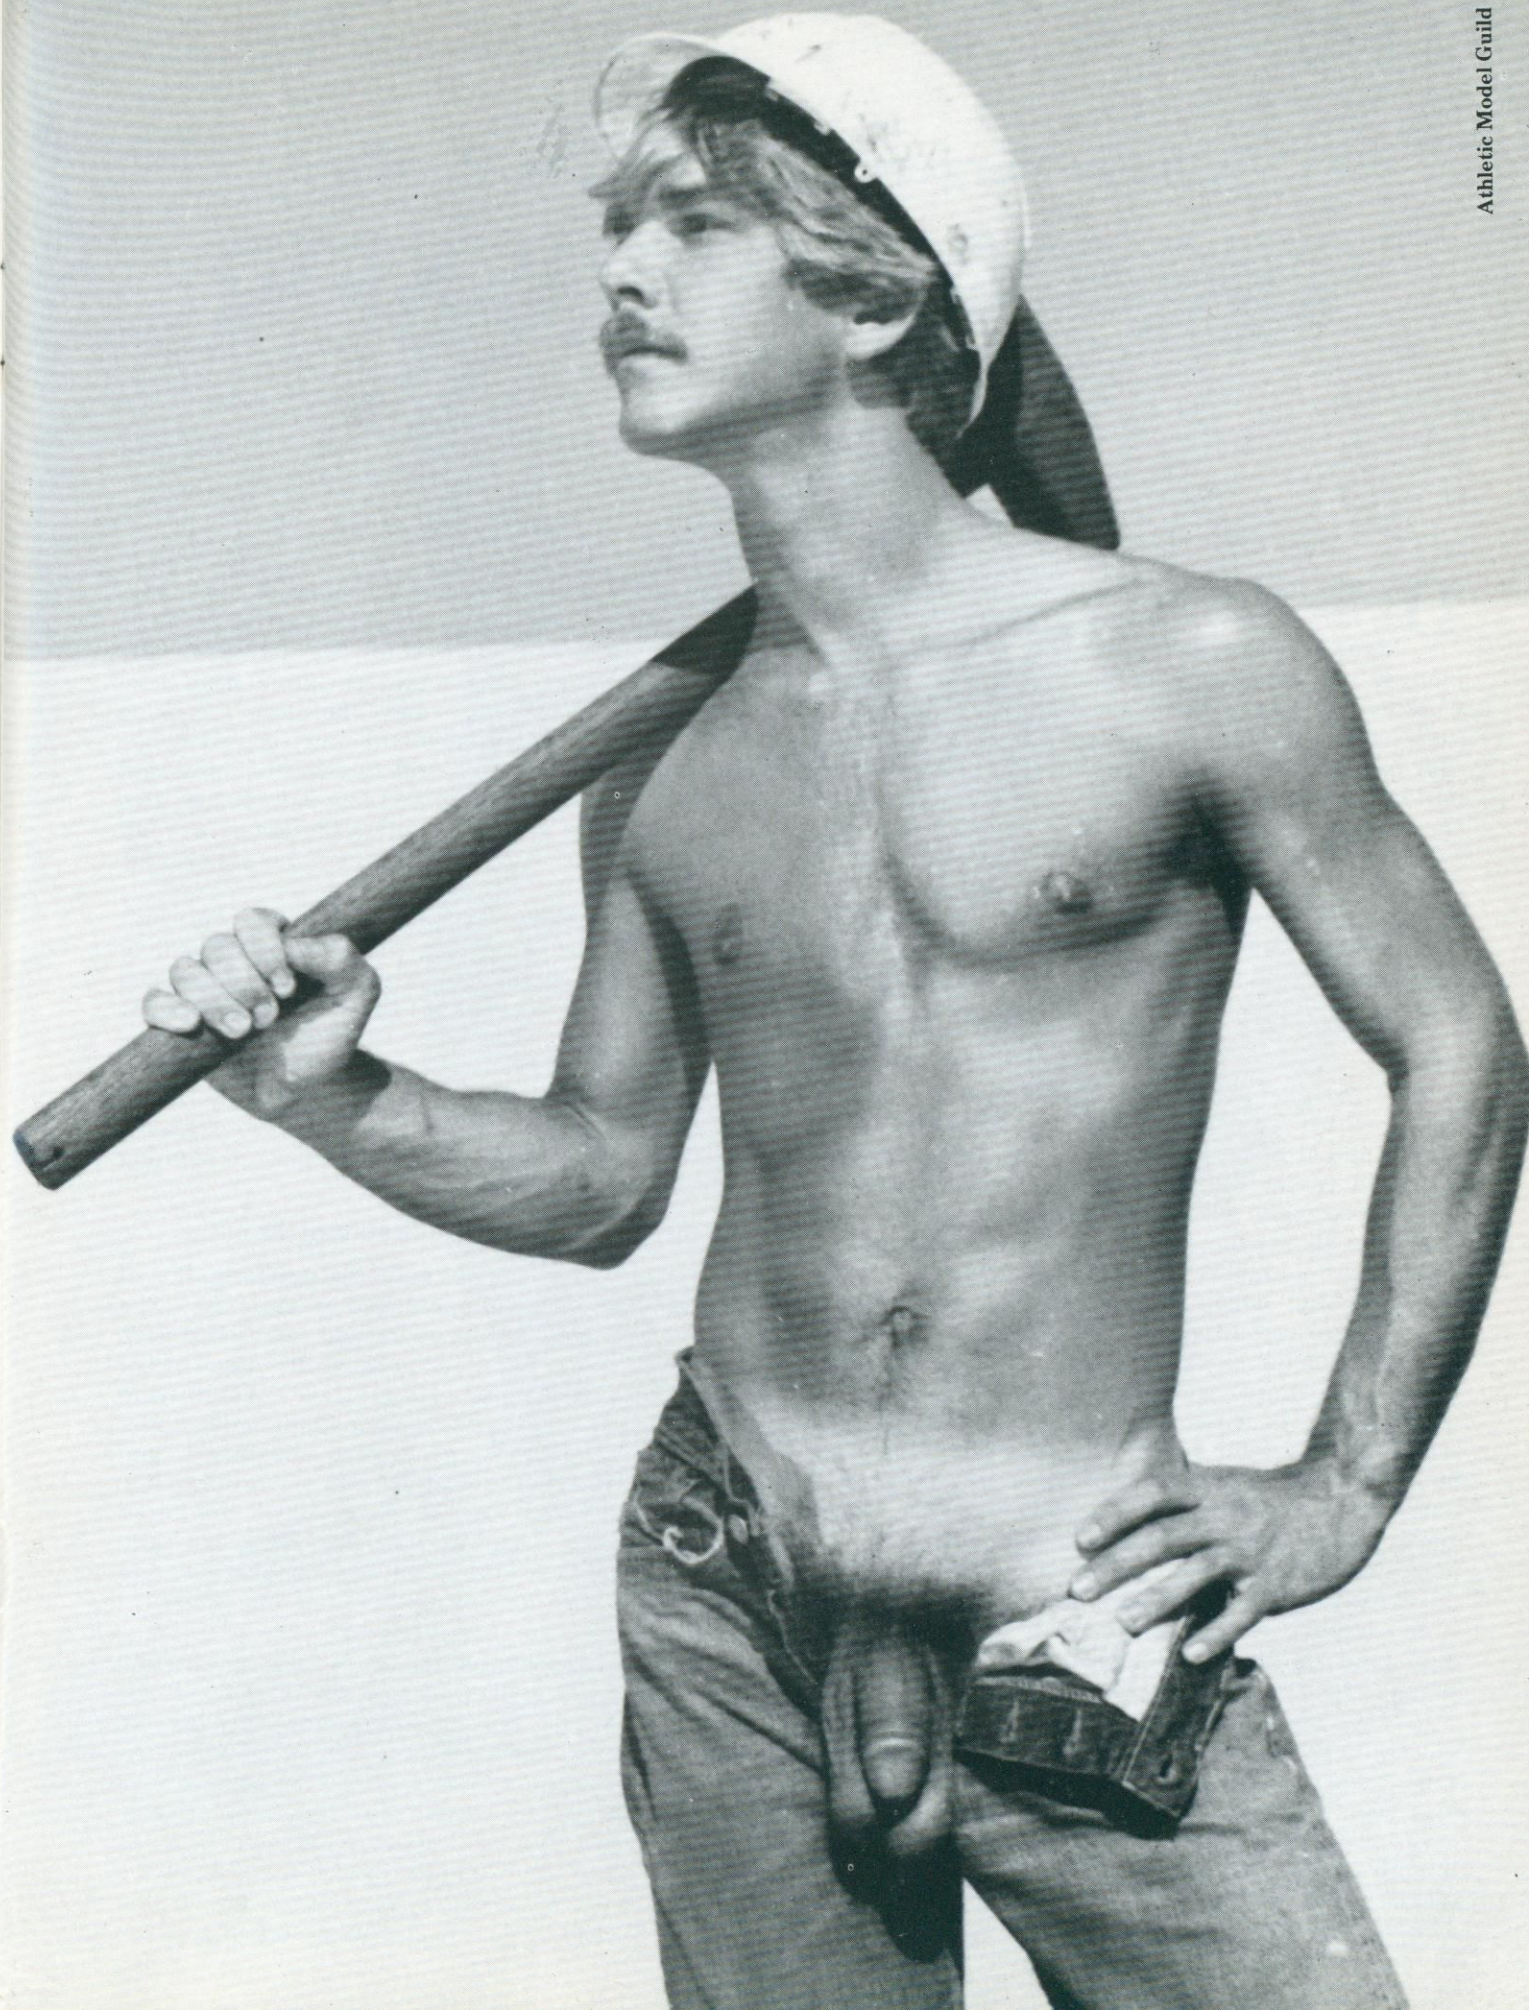

4. *Too much gay togetherness, too soon.* This may strike the reader as kooky since more togetherness is what we've always sought. The rationale for this and the just-mentioned other reasons requires some roundabout background, and we hope you'll bear with us.

#### FOR GAYS, BY GAYS

Conscious of newly-won and greater gay freedoms—swelling with 'Gay Pride'—we are taking full advantage of this. This praiseworthy goal has resulted in the spawning of immense varieties of new businesses, services and professions, now being candidly, openly run *for gays by gays*. (That admiring/envious straights are now aping us makes our victory even sweeter—causing us to work all the harder!)

Only recently shunned as 'decadent', gay ideas are now suddenly glamorous (straights are beginning

# Esthetic Surgery South Of The Border

## THE MEXICONNEXION

By Gus Ditz

**D**URING the brouhaha that led to the resignation of Bert Lance as Director of the Office of Management and Budget, TV viewers caught a glimpse of Senators Abraham D. Ribicoff and Charles H. Percy on the steps of the White House—both having just left a 'smoking gun' for Lance. As they paused while the cameras zoned in, one noted a curious phenomenon: that while both senators are in the same age group, Ribicoff—all beetle-brows, lined face, drooping dewlaps and sagging chin—looked like a tired moose.

On the other hand (or face), Percy looked as young and eager as a humpy number just out of the closet. This prompted Harriet van Horne in the *New York Post* to quote Shakespeare: "My God, what clean eyes he has!" Eyelids firmly sculptured—not even a 'linelet'. The skin under his eyes subtly taut—not even a 'baglet'. Not a hairbreadth of a wrinkle disturbed his young-looking face . . . his chinline as strong and firm as Superman's. As the columnist observed, in her view Senator Percy must have had the best cosmetic surgery money can buy.

As the day-to-day business of the Congress is being more-and-more conducted on the tube, it is revealing (but hardly surprising) that many other legislators are resorting to facial surgery to turn back the hands of the clock. The first, quite likely, was Senator Proxmire, with his Sinatra-inspired hair-weaving job. In a televised Congress, the Nielsen rating of a legislator's performance is becoming tied in with his 'youth image'—it has a lot of clout at the ballot-box. His constituents can tell at a glance how wisely they voted; how much on top of it all he is; how smartly he maneuvers; takes command; how effect his ploys and arguments are; how well he gets it all together. Senatorial longevity in this TV age diminishes as youth, all eagerness and with-itness, seeks to take charge—just as in commerce.

In itself, the fact of looking younger is a great plus; but a greater one is that looking younger inevitably causes one to feel and act younger—thus the psyche also has a 'facelift'. With a facade of greater assurance—youthful, if not teen young; attractive, though not challenging Adonis, facial surgery is no longer clinically 'plastic' or effete 'cosmetic', but esthetically adventurous! In this connotation it is not

surprising that more of us want a piece of the action.

Gay guys, especially, would eagerly undergo esthetic surgery if it weren't so astronomically expensive. But as 'plastic' and 'cosmetic' have been upstaged by 'esthetic'—and therefore *in*—such surgery has grown in demand and the price has zoomed simultaneously. Add to that the incessant increases in hospital costs and one is forced to give esthetic surgery second thoughts (definitely *not* 'off with the old, on with the new' until the piggy-bank grows fatter!).

That is the reason for this article: for if you can't afford \$5000 for a facelift, plus perhaps \$2000 or more for the hospital stay, why not have your facial flaws 'Mex-erased' South of the Border? In Mexico the surgeons are just as expert (European/American trained), and as esthetically-orientated as any in the United States, yet their fees and the hospital costs are vastly less. Let's look at some of the dramatic differences in costs for various operations, beginning with the most common:

### RHINOPLASTY (modification of the nose)

In general, this involves esthetic transformation of a humped, hooked, wide, crooked or 'ski' nose. (The techniques of the various operations mentioned here were described in detail in the April 1977 issue of *QQ Magazine*. Please refer to the article "Youthifying Surgery.") In this operation the patient is put under *euphoric*, rather than *unconscious* anesthesia, and usually leaves the hospital within two days—to convalesce at home for a few more days, comforted with ice packs, aspirin—perhaps with tea and sympathy—with everyone on tenterhooks awaiting the unveiling. No sex during this time, of course . . . unless you want to have it done all over again.

In Mexico the surgeon's fee would range from \$275 to \$1000, depending on the extent of the operation. In the United States, however, his fee would be between \$600 and \$1800. Add to that the lower hospitalization cost in Mexico (particularly in Guadalajara . . . in Mexico City the hospital rates are somewhat higher): about \$135 per day, as compared with the \$200-plus (and it'll be higher by the time you read this!) in the United States. # Fuckalickin' Good

Great Anal Sex~EveryTime!

by Terry McWaters

IN speaking of boredom, Edna St. Vincent Millay once said: "It's not true that life is one damn thing after another—it's one damn thing over and over." We reflected on how this truth applies to gay sex as we were arranging the Personal Ads to appear in *Ciao!*, *BODY*, and *QQ Magazine*—finding far more of them from those who identify themselves as *Active French* than *Passive Greek*.

Allowing for the undeniable fact that many really do just want to suck—to bring a trick to ejaculation by mouth alone—there must be countless thousands who would like to be fucked, but have remained anally untouched because (1) they fear possible pain, or (2) fear that a probing cock would open such a Pandora's Box of slimy effluvia that the embarrassment of the 'end result' would cause them to hang their heads in shame.

Such fears should be groundless, in view of much published gay sex-technical information. When one understands that any initial discomfort of anal penetration can be avoided by an easy-to-learn, easy-to-do muscular movement that opens the anal sphincter to say "Welcome!"—and that complete cleanliness of the anorectal area (the action arena) can be assured for one or many tricks by the simple, modern gay douche—there is nothing to hinder the full enjoyment of anal sex. No reason why that ad shouldn't be changed to read *Active/Passive Everything*. No reason for "doing one damn thing over and over."

Through understanding of these two simple techniques, and by practicing them in your bathroom, you'll not only be far less gingery about taking a cock up the ass, but absolutely wild to try it. Then the pleasure you derive will be enhanced as you discover more erotic ways to respond to a partner's urging(s).

This latter expertise is also easy to acquire, although obviously not as a 'bathroom exercise'. It is a sex *adroitness* that will come through experience with partners of varying cock size . . . from three or four to a "Good heaven, it must be eleven!" inches. In this

piece we should like to explain how all of this can be done, so that you may enjoy fuckalickin' good sex—every time. A little anatomical filling-in at this point may serve to clarify the techniques involved, and make them easy to do.

### THE PLAYPEN OF THE COCK

The arena for anal sex is generally thought of as anus-plus rectum. When one considers the entire length of the working trajectory needed for the guest cock, this is a logical and clearly-defined way to look at it. You'll see at once that you have a natural *capability*, like everyone. This builds confidence.

The rectum is a 6-inch extension of the lower bowel. Add 1-plus inch for the anus and you now have 7-plus inches of working space. Take also into consideration the 'buntiful' bounciness of the buttocks—especially if they are full, muscular and lickily rounded, and what you have is a buffer zone through which the invading cock must *first* pass. So allow another 2-plus inches needed for a cock to get through this 'end zone'. Call it a total of 9-plus inches of heavenly battleground. (What a locale for *Son Of Star Wars*!) It takes a mighty long cock to touch the top of the rectum. Still, some do . . . some doo-o-o. So when you're letter-perfect in your bathroom homework, try on something like a Tanzanian Twelve (our lax immigration laws make him easier to come by)! Beyond 12 inches, the Africans can tie it in a sailor's know and begin again at 'taw' . . . for a picture of this, see the special-interest magazine published by QQ Publishing Company. It's called *B\*L\*O\*W*, and an advertisement for it appears elsewhere in this issue of *QQ Magazine*.

Actually, if the invading cock breaks the sound barrier at the top of the rectum it will only schnozzle on into the sigmoid colon. This is no big deal, considering that men who have annual physical checkups get the sigmoidoscope up the ass (it feels like a cock) to see if anything interesting has developed along the way. This goes farther up the gigi than any cock.

So the anorectal area is where the action is, and—*anatomically*—is where fear, once allayed, turns into sheer expectation. There is a system of opening-closing/expanding-contracting valves and muscles in the rectum, generally referred to as the *anal sphincter*. It is, however, two sphincters: the larger and stronger is the *sphincter ani externus* (where the digestive tract ends), and the *sphincter ani internus*—smaller, and inside the rectum, and enclosed by, and operating simultaneously with, the larger. The sphincter opens to expel waste; then closes 'tight-ass' until another buildup of waste becomes so oppressive and urgent that the sphincters reopen and drive it onward and outward.

The anal sphincter (spoken of as a unit) operates by conditioned reflex when internal pressure builds up. This is its *natural* function: to *open*, and *force outward*. Also, it can be forced still further open by an individual's *willed muscle control* when one is constipated. What is *unnatural* (though absolutely divine!) is that by forcing down—as if to shit—the sphincter opens to *receive* . . . to permit entrance of

something of equal length and mass/weight (cock *vs* turd), as it has grown accustomed to.

### FORCING THE SPHINCTER

This is where bathroom training in the basics of anal sex comes in. The technique is simply to sit on the toilet and practice pressing down (just as if one were constipated) until one feels the sphincter opening. After a few practice sessions this becomes automatic. And that's just what you do—and do easily—with the biggest cock of the handsomest stranger. Force down/take in. If the cock is well lubricated, the moment it gets past the sphincter it will go straight in, and the sphincter will open wider still to accommodate it—*automatically*.

It should be stressed, however, that this idea would not win favor with your doctor. (But then, for that matter, he wouldn't approve of anal sex anyway—unless gay himself—so what?) The reason: that if greater-than-necessary force is mentally applied to open the sphincter, the risk of hernia appears.

To avoid this, when practicing, place your hands against the lower abdomen/groin and press *in* as you press *down* on the sphincter. After all, once you have 'educated' the sphincter—once it learns by suggestion (again, conditioned reflex) what you expect of it, little extra forcing of it is necessary in sex action! It will cooperate. It usually happens that it gets quite as 'carried away' as you when a humpy number comes along, and happily gets into the act! So when you've had your matutinal toot in the tinkle-bucket, tarry a tad long. Make a few practice force-downs of the sphincter (always having hands firmly on and pressing in on the abdomen/groin—simultaneously). In just no time you'll have mastered the trick . . . so that your trick can master *you*. In this way, not only do you build up 'being-fucked' expertise, but sexual confidence that will, in a short time, enable you to take on anyone.

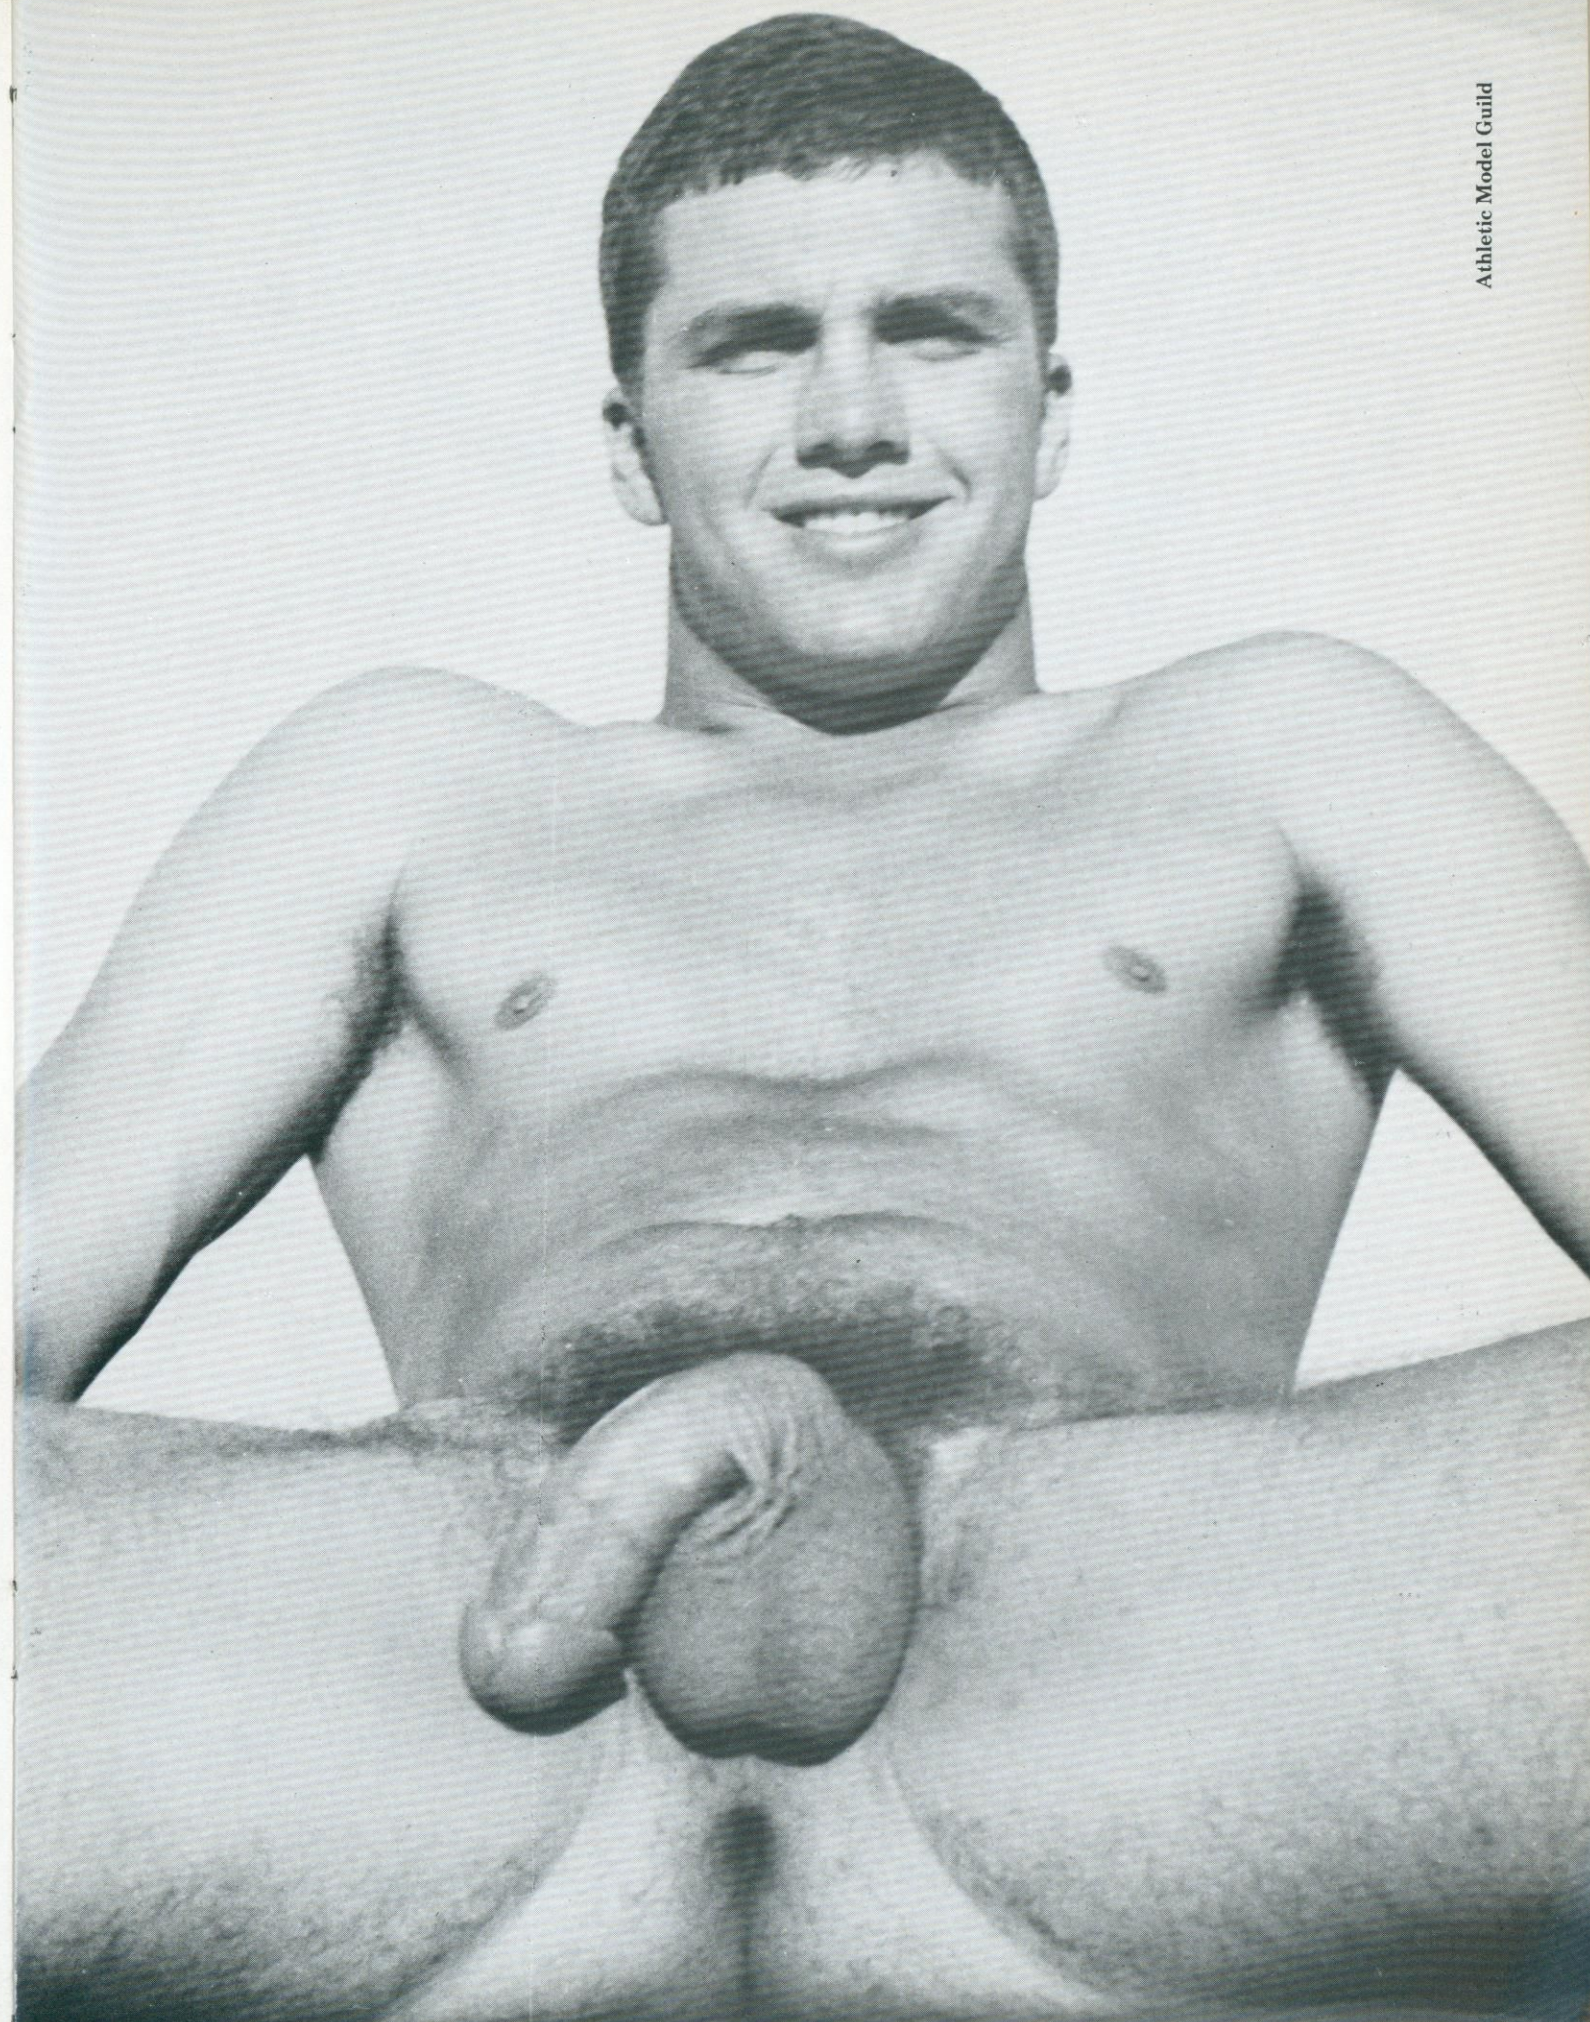

This can be made still easier and more assured by practicing with dildos of varying sizes. Check the back pages of this magazine and you'll find how many sizes are available. Then, warmed by your hands, and lubricated with K-Y, Vaseline or Crisco—as you would a cock—pressing in-anus with the dildo as you press down with your sphincter makes this great fuck training. Many like it as much as (and sometimes moreso) than an actual cock. Of course, certain psychological reasons for dildo *vs* cock account for this—all far too involved to deal with (even if one could) in one article.

### AVOIDING SHITSPILL

Cleanliness is of the essence in anal sex unless, of course, one is of that happy breed that turns-on only to scat sex. But that's a different turd, and there'll be more information about this kinky sex scene in future issues. What's important is that knowledge that the rectum/lower colon are empty alleviates any fear of shitspill.

No matter how expert one may be in forcing the anal sphincter open, if the colon and rectum are not free of slime/fecal matter/mucous, a certain dread ensues and clouds

# Torso-Tightening Surgery Showcasing Your Jewels

by Roger Watson

**C**HUBBY-CHASERS are a happy lot, and as warmly welcome under the Gay Umbrella as all other cultists and fetishists. Yet they will likely remain a minority group, for in this age of scale-watching they are outnumbered by gay guys who idealize two quite different types of the 'corpus delicious'. One, the *romantic*—the Apollonaire, naturally slender, symmetrically-proportioned body of the man who ensures its unfailing sex-appeal simply through sensible diet. The other, the *heroic*—that of the bodybuilder who 'pumps iron' for a more overpowering, though classically-defined super physique. Just the thought of even trace-fat veiling the glory of the body brings on instant shudders . . . the mind boggling at what sexual disaster this may portend.

Between these types are the greater numbers of us who find that to keep one's 'jewels' showcased against a slender background is an exercise in near-futility . . . as endless and unavailing a task as that of Sisyphus, a mythical kind of Corinth who was condemned to Hades to roll a heavy stone up a steep hill, only to have it always roll down again just as he was about to reach the top.

Many of us seem to mimic Sisyphus in following certain diets. To preserve a degree of body balance, attractiveness and ongoing sex appeal we seize upon every new crash diet—certain that it's the be-all and end-all of figure shaping—only to abandon it, for one reason or another, before it effectuates what is claimed for it. What is worse is a crash diet that works too quickly and too effectively, since muscles and tissues are deprived of many essential nutrients.

Any crash diet is injudicious, and so before we're very far along with it we experience not just a happy loss of weight, but note a sagging of the skin under the arms (the triceps area that gives a man's arms their greater fullness); 'pouting' pectorals that begin to droop; shifting, loose abdominal muscles; and (sob!) an apron of drooping flesh just above the groin that obscures much of the impressiveness (and fullest size) of the cock. If such dieting is continued by one who was initially quite overweight, the 'jewels' of his balls become 'cloistered'.

Against the sexy showcase of a lithe, slender body—or one that is a marvel of super muscles—

even a four-inch cock can look as impressive as the *Concorde* zooming on takeoff. But monster meat—even a thick nine-incher—peekabooing from the cover of a fleshy groin loses visually half its size and—except for the fetishists—most of its turn-on. You must *really* have a thing about huge cock size to have a go at it.

Still another unbeautiful effect of a crash diet occurs when waistline fat is so quickly dieted off that it begins to hang, fringelike, around the hips. Also buttocks that have grown flabby as they've grown fatter, and which have, in most cases, lost so much muscle tone they won't respond to the ins and outs of anal sex as flexibly as they did—and should. So it's quite understandable that a just-cruised partner—having been literally *deceived* by one's newly slender look (in clothes)—is disgusted when the full effects of the crash diet are nakedly revealed.

Although this does not relate to crash-dieting, there are many gay guys who have always enjoyed a very active sex life, and who—having come to the age where they've given up exercising and are no longer as careful of their diet—have developed many of the 'symptoms' just mentioned.

The problem here is not one of dieting as a deliberate *project* to reduce weight, but a loss of muscle tone and particular *skin elasticity* brought about by decreased exercise/activity and a less-demanding appetite, or an appetite more easily satisfied with a few foods, many of which lack important skin-nutritive/muscle-nutritive values.

Having been a successful sexist for so long, such a man forgets that the *status quo* doesn't remain forever 'quo'. In any case he (or even a man in his twenties who has had a long, debilitating bout with hepatitis or incompletely-treated VD that recurs and weakens) will note crepey skin under the arms near the armpits; loose pectorals; the loss of abdominal-muscle firmness and definition; and that an apron of weakened muscles and loose flesh now cowl a still-noble cock and/or low-hanging heavy balls which were always his pride and joy. Happily, these don't change!

# The Case Of The Lousy Lay

## HOW TO CONTROL CRAB LICE AND OTHER SEX-RELATED PARASITES

BY SCOTT YOUNG

**T**O toy with the title of a long-popular song, sex with a humpy number may indeed have been Delightful and Delirious the night before, but the morning after may prove to be *Delousy*. Delovely it ain't when your body is on fire as a horde of ravenous crabs dig into the skin of your pubic area, eyes red with blood lust.

What is worse is that if you have a magnificent growth of hair all the way from cockpit to armpits it gives them a wider area to explore. Crabs, or crab-lice, have a thing about hair. Not only does it keep them warm and comfy while they pursue their anthropological excavation of y-o-u, but it provides a nesting place for—as Lyndon Johnson was wont to say—the “women folk” to attach their nits (eggs), which will hatch in about seven days.

Crabs usually avoid open expanses of skin—particularly if the body is muscular, or firm. If, however, you haven't done the ‘Pumping Iron’ bit for a long time, and the skin is not as taut as it once was, they often take up residence in the folds. So unless you get rid of these pests right away you can expect continuing trouble.

Don't underestimate the fortitude and staying-power of the crab, for once on the skin, he digs in—and deeper, the longer he remains. Spartan measures are called for, because hot water and soap alone, even scalding and scads-of-it, have only a surface effect. You may get rid of some on less-hairy areas where they haven't as yet got pore-deep; you may get rid of more by shaving the pubic-body hair practically down to the follicle (leaving the cock looking like a lost popsicle); and if you pin them down with a magnifying-glass you may be able to tweeze still others before they make their subdermal descent. They are tricky and daring, however, and resist most measures except special parasite medications.

### UGLY!

The crab-louse is an ugly, determined creature. Seen under the magnifying-glass he really does look like a crab in miniature. The difference is that *he* eats *you*, not vice versa—as with the seafood kind. Although at full length he measures less than a fraction of an inch, you'll see that his body has a

head, a chest and an abdomen. He has two antennae instead of ears, and his mouth is like the long blade of a switchblade knife—a sharp *stilet* comprising three parts, and forming into a hollow tube (think hypodermic needle) through which he sucks your blood.

Attached to his chest are six legs with claws that grip the flesh like a vise. His body is smooth and hard—and so armor-plated that your hottest water and strongest soap don't even faze him. Before he gets down to the Dracula bit of drinking your blood, the crab-louse is gray—which makes him hard to see because he looks so ‘skin-like’. But when he has drunk his fill, he looks really turned-on. Still, even though now he is plainly visible, he hangs on, and only if you have a stranglehold can you pry him away with tweezers. Attacking him head-on in this way, even though he is now bloody visible, will be only partially successful because he and his cohorts and concubines are racing across your body, and you'll need to be something of a contortionist to get at them from almost inaccessible angles.

### SCAT CRABS?

Some crabs, believe it or not, are already into scat! They love ass play, and anal hair is a particular lure. When this leads them past the anal entrance—where the hair ends—they find themselves in a cozy, warm, dark, shitty interior, and their females begin digging into those ‘nooks and crannies that hold the melted butter’ to deposit their nits. You see, being TV-conditioned, they think of your buns as just big English muffins!

Crabs are so daring they'll actually ascend the body right up to the eyebrows. Beyond this point, however, another member of the crab syndicate takes over—the cranial louse. It's his territory and he's of a wholly different breed; he's also easier to get rid of. If you are a rimmer, with eyebrows large and thick, they can pick up crabs from the lick-lick crack of the ass and work *downward* to your balls via armpits, chest hair, navel tufts, and on to the whole megilla, thus reversing the procedure. Chalk them up as versatile.

It's mostly wishful thinking to blame the fact of having crabs from

### CUNT HUNT

Dear Gabby:

I've never had a woman and would like to hunt up some cunt and see what it's like. Can you help prepare me for my first?

J.R., Baltimore, Md.

Dear Cunt:

Perhaps this little ditty I scraped off a toilet wall will help:

*A cunt is a mystical creature,  
All mangled and covered with hair;  
It looks like the face of a preacher,  
And smells like the ass of a bear.*

Enjoy!

### THE TOUGH GUYS

Dear Gabby:

I like the tough guys. How does one get into leather?

T.S., Washington, D.C.

Dear Tough:

The same way one puts on any other kind of clothing!

### THICK MEAT

Dear Gabby:

I know a guy who has over 11" of thick meat (almost 3" around!). He wants to screw me. How do I go about it?

G.H., Chicago, Ill.

Dear Screw:

Very cautiously! Break out the Vaseline and poppers, bite the pillow . . . and S-C-R-E-A-M!

### S&M

Dear Gabby:

What do you think about S&M?

J.D., Portland, Me.

Dear Think:

Love 'em . . . they don't melt in your hands.

### JUICY LOADS

Dear Gabby:

Can swallowing a juicy load sour my stomach?

R.E., Miami, Fla.

Dear Juicy:

Not if it's fresh.

### STRAIGHT FATE

Dear Gabby:

I am now sure that my best friend is hopelessly straight. Is

there anything I can do to help him?

H.H., Los Angeles, Calif.

Dear Help:

Be understanding. Remember that many straight people are quite creative and contribute a great deal to society. We must be tolerant of the straight lifestyle. Heterosexuality is not harmful unless it is forced on children. Be loving . . . in a Christian way.

## THE GENDER BENDER (Continued from page 5)

is not precise—that sexual variation is desirable, and sexual compromise is as useful as is compromise between other socio-forces/drives. Thus having a clearly-defined set of genitals does not mean that they must be used strictly according to rule and textbook.

Things took a turn for the better when it came to be understood that sexual behavior is also a *state of mind*, and that its influences are societal and environmental, Customs, fashion, ornamentation, hairstyles—all influence sexual *behavior*. As an example, a tanned, muscular Tahitian boy may adorn his hair with a fresh hibiscus each day and it does not diminish his 'maleness' one bit. He may deflower all the virgins in his village and do equal justice to interested males. Customs and societal influence do not limit sex to gender/genital structure; they simply add a new *performance dimension*.

This is what the -ologists have been discovering, and it was a deciding factor in the declaration of the American Psychiatric Association that sex is a matter of *choice*. This, however, has been misunderstood by the Bryantologists and other anti-gay crusaders who have twisted the word to mean that gay guys choose that form of sexual behavior "as you choose to have lobster instead of corned beef at dinner." Sexual behavior actually is *shaped* by a number of factors outside the control of any individual, and it is this shaping that results in ultimate *choice*.

### THE H AND Y OF WHY

As a corollary to the APA determination of sexual choice, a more recent chromosome discovery should make *choice* understandable even to the Orange Queen, so if she should discover her husband fantasizing in the loo—with *QQ*!—the custard pie might be on another face!

The new discovery is the H-Y antigen—a chemical 'messenger', as scientists at the Memorial Sloan-Kettering Institute in New York City call it. How it gets its sexual 'message' across was described by Stephen S. Wachtel, an immunologist at the Institute, in an article in the *New York Daily News* of November 15, 1977.

According to the report, the genetic differences between men and women have been known for years. Women have two large X chromosomes; men have one large X chromosome and a smaller Y chromosome. What is of

first interest is that biologists have discovered that *all fetuses are created female*. The presence of the Y chromosome sends a flood of male hormones over the fetus, causing it to develop into a male. The Y chromosome does its work through the production of H-Y antigen, which is found in the cell walls of all men, *but not in women*. This H-Y antigen is also found in a number of species of animals and therefore influences their development as males or females.

It would therefore appear that the *degree* of maleness depends on how clearly the message of the H-Y antigen is heard. This seems to indicate that the more H-Y antigen is produced, the more hetero-dominant adult male characteristics will prevail. On the other hand, if slightly less is produced, a more sensitive ambivalence occurs—opening up those beautiful avenues of 'sexual choice' to be enjoyed by gay guys.

But if the antigenic message is weak or 'garbled', hermaphroditism can result. And it's also reasonable to believe that if it's not completely 'deciphered' it may be a latent force—a time bomb that explodes in adult life, often driving one into transsexualism. Some cases in point are the transsexual operations of male-to-female (Richard Raskind into Renee Richards), and female-to-male (Doris Richards into Steve Dane), both discussed in the article "By Sex Oppressed" (*QQ Magazine*, February 1977).

The exact composition of the H-Y antigen is not yet known; nor whether it might be possible to clinically replicate or synthesize it for sex modification. Much more study is needed. But it should be of pride and comfort to gay guys everywhere to know that one's sexuality is a *gift* of nature, to be enjoyed *naturally*, according to one's *choice*. No stigma . . . just a response to *natural* law. Onan would have understood.

## MACHO MASQUERADE (Continued from page 12)

'pre-kindergarten' machismo as an act of rebellion of a creative child. Yet, as the report notes, by the end of his life he had, in a sense, come full circle. "The man, who wore girl's clothing as a boy, closed out his career working on a book about a man who wore his hair like a woman's. And the childhood tea parties, 'for girls only', had given way to an interest in experiments in reversing sexual roles." The book is a story of

androgynous love, and so unlike Hemingway as to stun the mind of the reader who has followed the career of this giant of literature.

So amidst the saber-rattling and armor of an indefatigable machismo it is clear that Ernest Hemingway had given long and serious thought to the undercurrents of homosexuality in his life—wives and sons notwithstanding; that he had tried to come to terms with what was happening to his life psychologically, as he had physiologically when it was discovered that his liver had been giving him trouble for years. This, according to his son Gregory, who became a physician, and who noted in his book *Papa*: "Even in the male, the adrenal glands produce estrogen, or female hormones which are normally broken down by the liver. But if the liver is badly damaged, there can be a high concentration of estrogen in the bloodstream . . ."

Could it be that in writing *Garden of Eden* he had come to sense that the androgynous relationship of the characters Catherine and David were embodied in Hemingway himself? One awaits with eagerness the time when all of Hemingway's works will be fully available, and perhaps understand, at last, the reasons for, and pursuit of, his macho masquerade.

the sex scene, causing the receiver of anal sex to be first ill-at-ease . . . then uncomfortable, because he's holding back a time bomb of shit while taking in cock. Inevitably, with pressure from above, and from a cock below, there is a gas buildup, and he fears that if he *really* lets his sphincter go 'all the way' to take in King Whopper, he'll fart from here to 'farternity'. The scene is blown, and can't be remounted.

What is of signal importance is that cleanliness of the colon/rectum also permits the greatest *versatility* of the receiver since, generally, a sex encounter is not all one-sided . . . there's the give and take of anal and oral sex. Thus complete cleanliness of colon/rectum—and recleaning or mini- or area-cleaning after each trick, if you're very active—is a daily must.

Don't make the mistake of doing this by laxative. This is the iffist way to clean the colon. Suddenly the body seems to act like a fountain and water pours into the colon and you have one

# SEA-GOING UNDERWEAR

Equally At Home On The Body And On The Beach

## THE MEAT SACK

A comfortable jock that cups your cock-and-balls completely. No leg straps . . . only a waistband in Small (28-30); Medium (32-34); Large (36-38). **Black, white, or assorted prints and colors.** Only \$3.50; 2 for \$6.50; 3 for \$9.00; 6 for \$17.00. Great under tight pants because unsightly undergarment seams are non-existent.

## THE HOME BODY

A beautifully tailored short boxer in comfortable lightweight poly/cotton for use around the home. Be stylish while lounging . . . and sexy too. No fly. Comes in **multi-colored prints** in Small (28-30); Medium (32-34); Large (36-38). Only \$5.50; 2 for \$10.50; 3 for \$15.00.

## SHEER DELIGHT

Our see-through nylon/spandex bikini is primarily underwear . . . but can be used on the beach if you're the bold kind. Comes in **Black and Nude** in Small (28-30); Medium (32-34); Large (36-38). Only \$5.50; 2 for \$10.50; 3 for \$15. Does not have a fly.

## "CHEEKS"

Let your cheeks hang out in our backless bikini (front is similar to "Sheer Delight" shown elsewhere in this announcement). Equally great as underwear or beachwear. **Black or white.** Made of nylon and spandex in Small (28-30); Medium (32-34); Large (36-38). Only \$7.50; 2 for \$14.00; 3 for \$20.00.

## THE JEWEL BOX

Our g-string is a full cup that accommodates all your family jewels—held in place by lightweight elastic bands. **Gold or silver.** When nothing more will do for the occasion . . . in one size only. Only \$5.50; 2 for \$10.00.

## THE BALI-HAI

A nylon and spandex bikini that has a criss-cross front design that places the cock-and-balls in their own pouch . . . a separate "flap" that when viewed from the side shows your pubic hair. Primarily underwear, but can be used as beachwear . . . if you dare. Full ass coverage. Comes in **white or assorted prints.** Small (28-30); Medium (32-34); Large (36-38). Only \$6.50; 2 for \$12.50; 3 for \$18.00.

## THE HIP-ZIP

A stylish short boxer in nylon that has zippers with decorative pulls on both sides. Practical too—because the zippers can be raised for active sports such as jogging. Tailored fit, in Small (28-30); Medium (32-34); Large (36-38). Comes in electric colors—**White, Red, Blue, Yellow or Orange.** Only \$11.00.

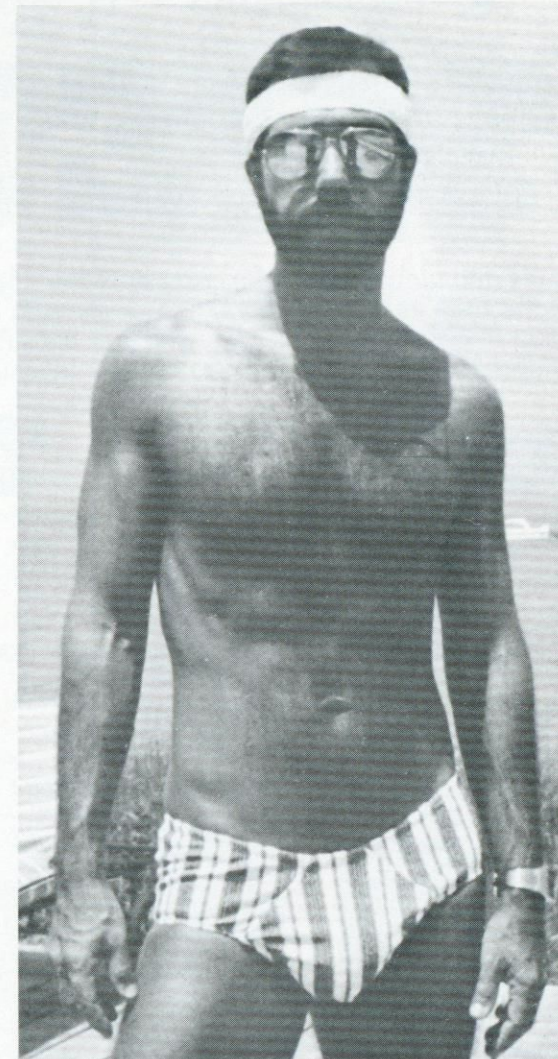

## YOUR RIGHT SIZE

Please furnish your correct size, using your underwear as a guide. **Our sea-going undergear is sanitary and cannot be returned—so order carefully.**

## COLOR CHOICE

To avoid possible delays when we are out of certain colors please indicate as many color preferences as possible. We will attempt to give you your first choice in every instance. When ordering prints and patterns (stripes) please indicate dominant color preferences.

helluvamess, and so you have to go, and go and go. Douching is best, it's cleanest and easier to do. It's done sensibly, and all the more easily, via enema while sitting on the toilet. Earlier, gay guys hung an enema bag filled with tepid water, from a nail higher than one's head, when seated. Inserting nozzle in ass, then opening the catch, allowed the water to flow into the colon. This is still most effective, for two full bags of enema water cleans out the entire colon/rectum. Done at least one hour before sex, one can carry on magisterially, being untroubled by any fear of leakage. With an hour's interval before sex, any slight seepage of enema water (trapped in the bowel and released as gravity pulls it down) can be expelled. A shower before sex, and it's great.

Gay guys of today, however—particularly very active sexists who have more than one trick per day—realize the need for recleaning the anorectal area before each new trick. In other words, on a full day of sex, a fuller enema once, then 'spot' enemas as tricks may require. So they appreciate the more convenient Folding Douche Bag and the Bulb Syringe. If you'll turn to the rear pages of this issue to the illustrating advertisement you will see how this works. The Folding Douche Bag holds 2 full quarts of water, and comes with a syringe for a quick rinse (or rinses, as needed), and a longer insert if one wishes a deeper cleansing (past the rectal portal). This small bag—easily taken with you in your shoulder bag—can be prepared for use almost instantly. Thus it can be used for a complete or partial (area) enema.

The Bulb Syringe has an 8-ounce capacity, and is just the thing when tricks are coming right and left—particularly in close quarters, such as public toilets. A quickie refill at the sink, and a quickie rinse will give 'even Steven' treatment to all who sex with you. It's the smart, sensible, no-fuss way of making every moment of anal sex one of assurance and delight.

It is well to remember that whoever fucks you will likely be expert enough to lick a little before he fucks a lot. This is a most erotic way of getting your buns warmed up and your anus and rectum relaxed.

In turn, this makes it easier for you to force down and open your anal sphincter like a giant sunflower turning to the sun! If your ass is clean you're gonna get a lotta lickin' ... a real turn-on, so that when he lubricates his cock and your crack, and says "Tally-ho!" it will go in all the way—easily, fully, and delightfully.

Having a cleaner rectum/colon still

## POSITIONS IN ANAL SEX

Everyone has a favorite position, so there is no one *best* position for everyone. Some of these are:

1. Receiver lying on his back, legs up (or thrown back, or straddling the giver's shoulders), the giver pushing in and downward.

2. Receiver bent over in 'dog fashion', either kneeling, or standing flat on the floor and bent over at the hips—optionally resting the upper body on a bed or table, with giver pushing straight in.

3. Lying on one side, with or without one leg thrown up to permit deeper penetration.

4. Lying on your face with hips propped up on pillows to permit deeper access (an exaggerated version of this position is used by proctologists who require deep and painless insertion of their proctosigmoidoscope).

5. Lying on your back on the edge of a table or bed with your legs straight up, held in place by your partner who pushes directly in.

6. Sitting on your partner, who is either lying flat on his back, or sitting in a chair (this latter position is so often seen in pornomovies where it is useful in showing a quick john fuck). The 'chair' version is particularly effective for beginners who want to be in control of entry, and who are a bit gingery about anal sex. It allows them to sit on the cock slowly, and to the degree desired, and/or to pull off/readjust/sit again, until painless insertion is accomplished.

Once relaxed, a new position can be substituted, since by then the receiver has greater confidence. All positions that force the buttocks apart—as in throwing the legs overhead—permit deeper penetration, since the thickness of the buns is minimized and does not provide a cushioned bumper to keep the last inch away from, and out of, the rectum.

As we have mentioned at other times, the most comfortable cock-in-ass is 6 or 7 inches. This is not so long as to exert pressure on the bladder and other internal organs, but is long enough to remain in without having to pull in and out on each thrust. To minimize the discomfort of a big cock, avoid positions that force the buns apart, in order to restrict completion, if desired.

To avoid continuous in-and-out insertion of a *small* cock, use the positions that force the buns apart in order to keep the shorter length from

pulling out.

Uncut guys are easier to take simply because once entry is made the cock more-or-less 'trajects' within its own shaft of skin which remains 'locked' in position against the walls of the rectum, causing less friction on the anal sphincter.

Again, by using dildos of 'graduated' sizes, especially at the beginning, makes sex with all sizes of real-life cocks easy and confident. But under no circumstances should one use hard objects like wood, and never, never, *never* use any dildo-object made of glass or pottery.

...

## THE CASE OF A LOUSY LAY

(Continued from page 27)

sitting on a toilet seat in a public john. Unless the seat is wooden and cracked—providing a nesting place for nits to hatch—the likelihood of getting them here is remote. Yet, sometimes this does happen when there is a big daily turnover (or sitdown) of guys who have neglected personal hygiene. So whatever crabs one picks up in the cracks are strays—not enough to be considered an invading army. Take care anyway.

## DE-CRABBING

Only chemicals, or ointments or lotions containing strong chemicals, can destroy pubic lice. One application of *Kwell* Ointment can repel and destroy an entire army of crabs. Keep it on hand. Although this product was originally intended to rout scabies caused by another species of insect—the female of which causes intense irritation through burrowing into the skin to lay her nits—*Kwell* works equally well on crabs. (Since scabies may be contacted from a bedsheet on which an infected person has lain, you may think you have crabs when you really have scabies.) In any event, rub *Kwell* into every itching area, and into the weblike stretches of fingers and toes. The Crab Express will skedaddle ahead of schedule!

It may be that the very names of the ingredients of some topical de-crabbers are enough to frighten the varmints away. *Kwell*, for its de-crabbing effect, contains 1½ gamma hexachlorocyclohexane in a vanishing-cream base. Isn't that a jawbreaker of a word?

Another effective de-crabber is *Topocide* (which has a lot more jawbreaking names of ingredients . . . benzyl benzoate; Benzocaine; Bentonite Magma; polysylkylene, among others). And a particular

## SKIPPER'S MATES A PEN-PAL MAGAZINE FOR GAY MEN

Every issue of SKIPPER'S MATES is chock-full of personal ads from men seeking new friends and correspondents in all areas of the USA, in Canada, and around the world. If you wish to make friends with other guys, come join our gay crew and discover how you can do it—with SKIPPER'S MATES! For details on subscribing and on placing an ad—plus a copy of our current issue—send \$1 to: Skipper's Guides, Dept. A-6, P.O. Box 92, Danville, Kentucky 40422. You must state that you are over age 21.

"Come Cruise with the Skipper"

favorite(!) of gay guys is A-200 *Pyrinate*. This comes as liquid or gel. The gel is preferable since it's quickly effective and doesn't irritate the skin when applied as directed.

In a pinch, simple kerosene works, but some with sensitive skins may find it irritating. So pick up one or more of these de-crabbers at your drugstore and keep in your medicine chest. Drugstores are often closed at night, and if you don't have some on hand you'll have to suffer until cockcrow before the drugstore opens, if you should discover them at bedtime.

Always check the body of a strange/strange-looking trick. If his skin shows pustules, or irritated redness, and if he scratches a lot, play it safe. When he's gone, take a hot shower, and 'Kwell it', before crabs, scabies, or others of the genus louse get the upper hand. Why suffer needlessly?

## AMEBAS AND WORMS

It's also worth mentioning—particularly if you are planning a tropical trip—to be on guard against other parasites, such as amebas and worms, and, of course, against hepatitis. We always think it wise to remind readers—especially rimmers—that the tropical asshole is never as hygienic as those at home. Thus the possibility of developing hepatitis should be born in mind, and prophylactic measures taken before, during and after a trip. Have a shot of gamma globulin before you leave... a booster shot while away... and a final one when you return.

## AMEBIC DYSENTERY

Amebiasis is its clinical name, and it's caused by a protozoon—*entameba histolytica*. Travelers south of the border, or who are Caribbean or Asia orientated, are familiar with *turista* or Montezuma's Revenge, caused by this protozoon. Severe diarrhea caused by a toxin released by this organism in the colon usually runs its course in about four days. This is the least dangerous form. *Lomotil* or paregoric will retard the diarrhea, and one is made comfortable in a shorter time. The discomfort soon disappears.

But not with other amebas—especially the quite harmful ones of the *entameba histolytica* group. If not treated, the ameba(s) will invade the intestinal wall, hence on to vital organs, and cause extensive damage. Death has sometimes resulted from untreated (or unrecognized) amebiasis. Today, the preferred treatment is an effective killer called *Flagyl*—which is really a poison, and must be taken only by doctor's recommenda-

tion/prescription, and precisely at the dosage he determines is right for you. A stool specimen, taken about two weeks after the treatment (which usually means a four-times-daily dosage for 10 days with 250-mg tablets), should show no amebas. Also a blood specimen will be examined to determine if the organism has been eliminated from the bloodstream. For gay guys this 'waiting period' of *Flagyl* treatment is heartbreaking because they must refrain from having sex lest they pass along the 'goodies' to others.

Simple care while traveling abroad is still the best preventative. Drink bottled water, never tap-water (also making sure that you use bottled water to brush your teeth), and avoid raw fruits and vegetables, which are usually grown in the fertilizer of human shit. Remember that waiters are not always careful of hands-hygiene, and can pass along amebas when preparing fresh salads. Eat cooked foods only; if you want fruit, peel it yourself. Also, insist that the bottled water brought to your table is an internationally-known brand, and that it is opened at the table. Just asking for Evian or Apollinaris or Perrier is not enough—have the waiter bring a capped bottle to the table. Otherwise what you will get is tap-water in a name-brand bottle that has been filled and refilled, and which is very likely contaminated to some degree. Play it safe.

## METAZOAL INVASIONS

Worms (helminthes) co-exist with amebas beautifully. Where you find one, the other is not far away. The tropics are their home base, and they can kick up a lot of fuss. *Threadworms*, for example, nibble away at your gut and secrete toxins that can cause abdominal cramps, muscular pains, nausea, exhaustion (you sometimes can't finish the scene with even the humpiest hornyhung... and that's baa-a-ad!). *Threadworms*, as well as other worms invading the body, arrive through larvae ingested via contaminated drinking water, and food that contains traces of fecal matter (either courtesy of your unhygienic waiter, or simply as an ongoing result of raw foods having been grown in human-shit fertilizer).

You'll therefore be interested in a fairly new drug that treats such worms effectively—it kills 'em *d-e-a-d* and they pass out of the body through the intestinal tract. This drug is a liquid vermifuge called *Mentizol*, and it is—oddly enough—prescribed and administered according to *body-weight*! A cure is effected in 3 to 4 days. Ask your doctor about *Mentizol* if you are planning to leave your mark

on the tropics. It may help to prevent the tropics from leaving their mark on you.

He should be willing to put you on the scale, check your weight, and write a prescription accordingly. Then if one sublime morning in Yucatan or Cancun or Acapulco or some divine place in the Caribbean you find a slithering little stranger on the bathroom tissue, dig into the *Mentizol* as prescribed. You'll have a vacation without excessive worry, and, one hopes, a simply marvelous time.

## SHOWCASING YOUR 'JEWELS'

(Continued from page 24)

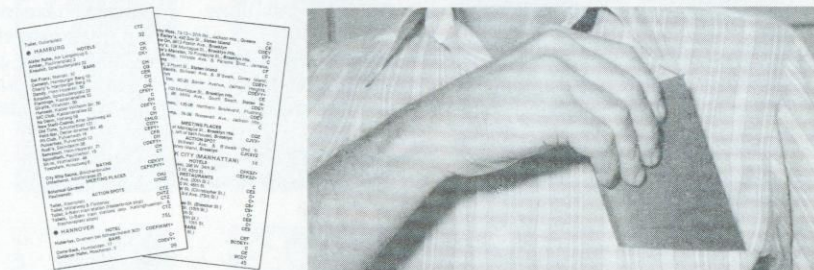

diet and moderate exercise regimen had been used to reduce weight over a longer period, none of these unbeautiful effects would have occurred. But as the saying goes: 'How can you 'un-ring' a bell?' Certainly some of this crash-weight-loss can be corrected or modified with special work on the many new 'spa'-type exercise machines... or even with just barbells and dumbbells. The pectorals, for example, will again respond to Bench Presses. Thighs can be increased in size and buttocks made firmer and more muscularly flexible by doing Barbell Squats just to *chair-seat level* (the buttocks just barely touching the seat of the chair with each Squat repetition... descending further tends to widen already-wide hips).

But in much of the abdominal area; the insides of the thighs near the pubic area (so vulnerable to view in sex—both oral, and when the legs are raised to fuck position); the fringelike droop of hipiness; and the crepiness near the armpits that has such an unattractive plaid-weave look... all these are not correctible through exercise and diet. These are the 'bell' that, once rung, cannot be 'un-rung' except through torso-tightening surgery known generally as the Body Lift (being much like the complete facelift) and/or locally, in spots, as *lipectomies*, which have nothing to do with *lips* but everything to do with 'ectomies'... incisions being made in several strategic areas to remove excess fat, or tighten loose tissue to restore its youthful look... all done so cleverly that even in kissing range during sex the scars are so hidden or hairline-unnoticeable they would not elicit comment or speculation from even the youngest, most exciting (and excited) partner!

*Batwing arms* (drooping underarms) and *striae* (stretch-marks or

## 1978 GAY TRAVEL DIRECTORY

From The Editors Of Ciao!—The Most Celebrated Gay Travel Magazine In The World—A 1978 International Travel Directory Containing Nearly 4,000 Up-To-Date And Accurate Keyed Names And Addresses Of Gay Hotels, Bars, Baths, Movie Houses, Book/Sex Shops, Meeting Places And Action Spots Throughout The U.S.A., Canada, Mexico, Central America, The Caribbean, South America, Europe, Africa, The Middle East, Asia, And The Pacific... Your Passport To Gay Adventure In A Compact Booklet Small Enough To Fit In Your Pocket!

## THE MOST ACCURATE GAY TRAVEL DIRECTORY IN THE WORLD

Nearly all existing gay travel directories are "rip-offs" of guides published years ago—providing information which is no longer valid. The editors of our gay travel magazine span the world—constantly gathering information for Ciao! They have prepared our 1978 gay travel directory—which we call "Private Stock." It contains nearly 4,000 accurate and up-to-date names and addresses of gay establishments and meeting places everywhere in the world—conveniently arranged by country and city in alphabetical order. By utilizing a concise system of "keys" we are able to present detailed information about each listing; the keys are so arranged that you can instantly interpret them and learn everything you need to know—whether a place is entirely gay, what you will encounter—young guys, old guys, sex, no booze, entertainment, food, lesbians, hustlers, muggers, cops, even dangerous animals (in jungle meat-racks!). And we dare to bare it all—including johns on college campuses, in subways and department stores that swing. By using small type which is easy to read we are able to cram all this valuable information in a compact booklet which is securely stapled together in magazine form and small enough (3x5) to fit in your shirt pocket. Its cover is durable and leather-grained with absolutely no "tell-tale" printing so that discreet travelers can use it anywhere. Plus other features such as where to look for sex in college towns, and how much hustlers are paid—and how to handle them. Published annually—"Private Stock" is the only gay travel directory you need... the only one you will ever want. It is your personal address book for hot times! Sent via certified 1st class.

'plaid-weave' checks of the skin around the armpits/under the arms/triceps) can be erased by making a lengthwise incision, removing some of the crepey tissue, then bringing the ends of the incision together again. Then if you'd like to do some Curls or work on the Nautilus Arm Machine in your local 'spa' this will give your once-drooping arms their former fullness and bounce.

While, as noted, Bench Presses with barbells/dumbbells can do much to restore the majesty of your chest, if the skin on the sides of the chest remains loose, to some degree, 'ectomies' alongside, and above—incisions made within the confines of the armpit area—can draw up the skin and give the entire chest the look of a perfectly-sculptured entity.

**Thigh Lift.** This should be of special interest to the active gay guys. Here the 'basket-weave' effect of the drooping inner thigh—especially vulnerable to view and speculation during sex—can be similarly treated. One or more wedgelike incisions can be made high up on the inside of each thigh and the crepiness removed. When the incisions have been closed only hairline scars remain. Even when the legs are thrown well up and very widely apart for the Grand Entrance of The Monster (or the most ham-like fist) your lover will never notice the surgical traces.

**Buttocks Lift.** This can also raise more than ass . . . it can raise the spirits of the most downhearted gay guy. Today the 'Buttercup Ass' is in—bouncy, firm and kissily curved. If, however, the line at the base of the buttocks is loose and floppy, this effect can cost you Brownie points! True, some designers of turn-on underwear/skinwear/swimwear are creating garments that tuck in this line, via lastex. But that's not much help when you're stripped for action. Or "It won't do for the meatrack!" Here, the 'ectomy' is made possible by pulling up the buttocks via an elliptical incision of skin and fat at the crest of the hip bone. Once healed— instant youth! And however minimally the scar(s) may show, this can be more easily explained (if one should be inconsiderate enough to ask!) as the result of some athletic derring-do, such as a skiing injury while *schussing* at St. Moritz. (If one *must* fib, at least be elegant about it!). If you get back early into sex, and it's still pink, he may just want to 'kiss it and make it well'.

**Abdominal Lift.** This corrects that most unsightly apron of flesh that droops over the groin area, visually lopping off two or more inches of whopper cock. The 'ectomy' is performed in two ways: (1) the incision

Catalogues One, Two and Three featuring 87 sensational nude models for \$5.00 via first-class mail. Our "Private File Brochure" is included at no additional charge. Please state that you are over 21. Include additional \$5.00 for airmail outside the U.S.A.

may be horizontal, in the middle of the abdomen at the level of the navel (in which case it will blend in with your abdominal muscle-structure and be thus almost 'ornamental' once your skin has been tautened and you've resumed your former Situps and Leg Raises, Twists and Abdominal Squeezes). Or (2) somewhere in the area of the pubic hair (perhaps both) where, obviously, the scar will be invisible (one would have to part the hairs to find it!).

It should be stressed that this latter 'ectomy' is a quite serious operation, for often a beginning hernia may have to be repaired. There is also the possibility of postoperative infection and/or hemorrhage, as well as discomfort and possible complications from the general anesthesia. So the Abdominal Lift—particularly if hernia repair is also involved—may require a ten-day stay in the hospital. So memorize your Blue Cross number and have it at the ready.

But it's all worth it in added years of happy cruising and more fantastic sex, made possible by the greater freedom of movement; the fact that compensation-for or concealment-of unbeautiful aspects of the nude body is no longer necessary; and that you have the mental assurance that all is well again. You'll not only look younger, but feel 'springtime young'.

The cost, however, is somewhat deflating. At this writing, fees for the Arm Lift run from about \$800 to \$1000; for the Buttocks Lift, approximately \$1500 to \$2500; and for the Thigh Lift, \$1500 to \$2000. When more than one 'ectomy' is done—as in the complete Body Lift, figure \$3000 to \$5000. Hospital costs of \$200-plus daily are additional, but undoubtedly your hospital insurance will take care of that. It is also possible that part of the surgical fees can be charged off to your insurance plan/coverage. Particularly if the surgery may be deemed necessary to your health.

But again, as discussed at some length in *The Mexiconnexion* in this issue (please see page 18), any or all of this surgery can be performed at 50% less in Guadalajara, Jalisco, Mexico. The surgeons there (many of whom are not only members of the Plastic Surgery Society of Mexico, but of American and British plastic surgery associations) are as expert as any in the United States or Europe.

If you are further interested in having your body almost literally transformed through cosmetic surgery, your personal physician will have a list of Mexican surgeons and can steer you confidently to one who is an artist in his field.

Body Lift surgery can change your

life and lifestyle . . . and make every day a day of conquest. It really *can* un-ring a bell!

...

## THE MEXICONNEXION (Continued from page 18)

therefore, would be minimum \$545/maximum \$1275. In New York, Chicago or Los Angeles: minimum \$1000/maximum (as of this moment!) \$2200. Roughly a saving of 45%.

### BLEPHAROPLASTY (eyelid surgery)

Many men may have quite youthful and attractive faces that no reputable surgeon would care to change (and usually won't; he'd suggest that you see a psychiatrist first). But sometimes—due to some vagary of nature or glandular overproduction—the eyelids become hooded/fatty/baggy/poochy/puffy. This can give even the most wide-awake *discomane* the sleepy-eyed look of a tranquilized turtle . . . 'Quaaludicrous', one might say. Just this one facial aberration can throw the rest of the face out of kilter. In such a case, surely one should look toward eyelid surgery as an esthetic adventure of great expectations.

In Mexico, eyelid surgery runs about \$275 to \$600—again, depending on the amount of time and extent of work involved to make the eyelids part of an all-harmonious facial picture. When performed in the United States this surgery is minimally \$700, to which add the cost of four days of hospital care, and the total would work out to about \$1500. Compare that with a total of \$550 to \$870 in Mexico and you'll note a saving, again, of around 45%.

If the eyelid surgery is performed as part of a complete facelift the charge for the eyelid surgery is usually included in the overall figure. This, however, should be firmly established. What is *not* always included in the overall facelift cost, in some cases, is the elimination of vertical frown lines. Generally, surgeons don't care to tinker around with this because at the present time the sole technique in use also cuts the muscles that control the frown. The result is that *expressiveness* of the face is inhibited. A once-animated face becomes as immobile and expressionless as that of an eternally-unsmiling Marlene Dietrich. As Gertrude Stein might say: "It changes the you of you!"

Mexico's leading esthetic surgeons, warns against the 'whimsical' facelift... just deciding on the spur of the moment that you'd like to look young and handsome—one/two/three. That old cliché "Pretty is, as pretty does!" applies especially to one contemplating facelift surgery. If you are overweight, he advises, first diet/exercise until you reach the ideal poundage for your height and bone structure... a weight that you *can* and *will* easily maintain. That this requires unfailing vigilance is part of the esthetic adventure.

The reason for this is that if you weigh more than you should and your facelift is scaled to a seamless smoothness at that bodyweight, if you then decide to become more sylph-like—losing even just a few pounds—your face and neck begin to sag and wrinkle... as a balloon from which some air has been released. If, conversely, you *gain* weight after the facelift, then your face will look tightly overblown—as a balloon about to burst. It loses all its new 'character', and so you wind up with about \$5000 worth of 'blob'. Before deciding on such surgery, therefore, reduce or gain weight to the point where you look your very best in clothes, in beach wear, and especially yummy for the meat rack. If you value your new youth and greater attractiveness (particularly when you have to fight off new tricks!) this part of your esthetic adventure will be Priority #1.

As mentioned, the procedural details of the complete facelift are described in "Youthifying Surgery" of the April 1977 issue of *QQ Magazine*. We urge you to read this if you contemplate having surgery. You will be reassured, and thus enter into the esthetic adventure enthusiastically (you'll actually be a *working* part of it—being called upon to assist the surgeon from time to time). If you do not have that issue you may obtain it from the QQ Publishing Company, 450 Seventh Avenue, Suite 602, New York, N.Y. 10001. Or you may obtain a reprint of that specific article for \$1.

Two questions frequently asked about the complete facelift are: "Won't it leave telltale scars?" And "How long does a facelift 'hold'?"

Certainly, any operation is an assault on the body and leaves scars. But esthetic surgery is so skillfully done that whatever scars result are so hairline thin, and so strategically located, that they are hidden by hair, or—if one is bald—cleverly concealed behind the ears. This is a wonderful time for facelift surgery because of men's longer hairstyles; more casual sideburns that often cover the ears; and moustaches and trim beards that also divert attention and conceal

QQ

hairline scars.

"How long does a facelift last?" The younger you are (in calendar years) the longer, because of the greater elasticity of the younger individual's skin. But even a man in his late seventies can expect his facelift to last smoothly intact for as much as eight years! Then the facelift can be 'touched up'—adjusted minimally where it appears to be losing some tautness. But by eating simply; sleeping a 'full shift'; drinking and exercising wisely, will extend the life of the lift without resorting to 'retucking'.

Now to the cost of rhytidectomy—the complete facelift. In the United States this esthetic surgery costs on the average about \$3000, although some New York and Hollywood surgeons think that's peanuts (forgive us, Mr. President), and charge up to \$5000. Add to this a stay in the hospital of up to ten days (because stitches must be removed intermittently, for one thing) at an average \$200 a day, and the total cost will be \$5000 to \$7000.

In Mexico, the same facelifts run from \$550 to \$2000. Add to that the ten-day stay at \$135 a day and you come out 'vernally and eternally' younger and handsomer for only \$1900 to \$3350. About 60% less than here. So feed your piggy-bank until he oink... then up, up and away!

### HAIR TRANSPLANTATION

Also, if—like Senator Proxmire—your hair is thinning, and baldness has no part of the image you seek, consider having 'hair plugs' from your remaining hair implanted in the balding areas. It's important to consider this before the 'crop' is entirely gone. 'Hair banks' don't work. Like certain organs of the body, your scalp will reject the hair of someone other than yourself.

Generally, from 50 to 100 hair plugs—each 4 millimeters thick—can be removed from the hairy area and transplanted in the bald areas, in one session. Naturally, this requires a very special surgical skill, and so your esthetic *facelift* surgeon may refer you to a specialist who deals only with hair transplants. He, like the facial surgeon, is a sculptor, and your hairline will be symmetrically contoured to your face.

After the first session there must be a few weeks for scalp recovery. Understandably, it will be sore for a time. Usually a second session will be needed with, again, up to 100 hair plugs transplanted. Then you'll have a fine, flourishing new crop of hair—everywhere!

Hair transplants are charged for 'per plug'. In the United States the March/April 1978

charge is from \$10 to \$25 per plug. In Mexico—\$5, average. It's not inexpensive! If, say, you multiply 200 hair plugs x \$10 American, you (or rather your surgeon) will tot up the tidy sum of \$2000. Do it in Mexico and it's \$1000.

At present the busiest place in Mexico for esthetic surgery—particularly the complete facelift—is Guadalajara, in Jalisco State. Because Guadalajara is only an airline hop, skip and jump from Acapulco, many Americans are taking advantage of this to combine facelift with vacation. There's nothing like a gorgeous Acapulcan tan to complement your facelift and make you all the more gojjus! Like come home and astonish us.

Mexico City surgeons charge more, and hospital costs there are higher also. But there is no finer esthetic surgery performed anywhere than in Guadalajara, and if you'd like to have it done there you might contact Dr. Jose Martinez Cortes, who is not only one of the best surgeons, but president of the Plastic Surgery Society of Jalisco.

Many Mexican esthetic surgeons are also members of the American Society of Plastic Surgeons—such a man is Dr. Palemon Rodriguez Gomez, highly respected everywhere. And some, like Dr. Armando Hernandez Fernandez, is also a member of the British Association of Plastic Surgeons. You might consult your own personal physician who can refer you to someone who deals in certain specific branches of esthetic surgery. With 'cosmetic lib' as much a part of the new freedoms as 'gay lib' or any other 'lib', you should have no qualms about changing your 'face style' as much as your lifestyle—for in a way, it's both.

Shifting sexual contrasts and eroticizations are always a surprise and delight. Adjust your SPM to get the most from each.

## SEX DRIVE DRAMATICALLY INCREASED!

### ancient secrets discovered...

Few herbs have seen such a shift in reputation as sarsaparilla. American Indian medicine men once cured physical and sexual debility with it. In the 1800s sarsaparilla became a national craze when it was used as a spring tonic. Then, in 1939 scientists found the secret of its power. Sarsaparilla is one of the few natural sources of testosterone, the male hormone. A high testosterone level in the body promotes sexual potency. Sarsaparilla is only one of the reasons Wilmont Herbal Blend makes a man into a stud. Here are some more facts:

Q. What is Wilmont Herbal Blend?  
A. It's 100% pure herb power! A stimulating mix of powdered damiana leaves, sarsaparilla root and kola nut.

Q. How does it work?  
A. In three ways. Sarsaparilla root increases hormone levels. Damiana is a mild euphoric, a reputed aphrodisiac, and a tonic for the sex organs. Kola nut reduces the energy requirements of the nervous and muscular systems by promoting combustion of fats and carbohydrates.

Q. Why should I take Wilmont Herbal Blend?  
A. The peak sexuality age for men is 18 to 20. After that our bodies produce smaller quantities of hormones. Disease, radical surgery, trauma, and the side effects of various drugs can also cause circulatory ills which interfere with normal sexual function. Wilmont Herbal Blend cleans and strengthens the urinary and sexual tracts so well that many customers tell us they achieve bigger, harder, prolonged erections with regular use. Other benefits are a higher energy level and increased sexual vitality.

Q. How long does it take?  
A. Herbs, like vitamins, take a little time to work their wonders. Most men start feeling a renewed sexual vigor after 30 to 60 days. Thereafter, continued, regular use of Wilmont Herbal Blend will maintain the higher levels of sexual energy.

pros from the also-rans. But it, too, should be heightened as mood grows more intense and the probability of cumming looms delightfully ahead.

The net effect of suction is to create a hotter 'crankcase' for the 'crank'. A more with-it tongue love. Don't gasp for extra air for suction, however. The idea is to 'pull in' slightly on air already in the mouth. In other words, use what you have, don't go on safari to gulp in more.

Be careful not to apply too much suction. If you do, what you create is not a 'housing' for the cock, but a vacuum . . . something neither you nor he want because (a) it slows the action and (b) it can cause discomfort—even pain—particularly if he is uncut. On an uncut cock, too much suction pulls at the foreskin and distends it, resulting in such discomfort that the cock begins to soften and fall, like a tired soufflé. On the other hand, if your partner has been circumcised the head of his cock is less sensitive because it's more rugged, and can take more suction. But again—not so much suction as to interfere with action.

The best way is to begin with an almost unnoticeable suction, and then—after every 8 or 10 plungings—intensify the suction slightly. Continue in this progressive way until orgasm.

It's also of great effect if you will increase the suction while your hands are doing something to/with his body—traceries/patterns with your fingers. Increasing the suction with such shifting hand-and-finger play can drive him up the wall. And if he has some popper at hand for such artful strategy, he may explode instead of just cumming!

Again, if you'll practice creating suction on a series of dildos of various sizes, you'll find it easy to do this—it will become almost an automatic part of your technique. Do your homework with a dildo. Don't practice on your partner until you're experienced in creating at least a dozen increasing degrees of suction. Also, you'll note that you grow more excited with each more intensified stage of suction play.

5. *Tongue-play.* The mouth should not be completely withdrawn from the cock during sex, for to expose the cock destroys mood that's often difficult to re-establish. Even if you're pausing for a rest, or to sniff a whiff of popper, keep the cock in the mouth. Relax your mouth, of course, when necessary, but during 'plungeless' periods, use your tongue to maintain sensation and erection. Just stroking the tip of the cock with the tongue is enough to give you a second wind, and it has the effect of keeping the sucking action continuous . . . seamless. And if you

are doing an uncircumcised individual, this tongue-play is a real trove. It heightens under-prepuce sensation to a surprising degree. Practice on a dildo . . . or even your thumb! Learn how to sensitize your tongue to sensitize your trick.

A variation of tip-of-the-tongue play is 'broad-of-the-tongue' play, especially useful when both of you want to extend the performance. In this case, using the tongue like a johnny-mop (the whole bit) is indicated. Lick, slide, enclose the cock with the whole tongue. And if you wish, lick the scrotum and adjacent erotic areas. This will both maintain sensation and prevent any loss of erection. The instant you sense any loss of mood or erection, however, get back on that thing and do a job. Revv-up that suction a bit and get on with Act II, II, IV (or more).

6. *Hand-play.* As mentioned, the hands and fingers help make fellatio more exciting. Too many, however, tend to rely more on hand/finger-play than mouth action. Won't work. Always disappointing. There's always a point where one's partner finds he must pitch in and masturbate to get the scene played out. But if you will think of your hands and fingers as assisting, then what you have is really an extra set of lips . . . and isn't that nice!

This works quite well on those who are not so easily aroused. Extra eroticization via hands and fingers can do a lot to raise the sexual temperature. Just don't probe and stab with your fingers. Slide and gently press. Wet your finger with saliva and slide it around and into his anus. If you find he likes this, curl-up the finger (if it's long and thick) to make it feel like a cock. You can also do this with a dildo if he's not averse to it. The only disadvantage is that it's only he who feels the action—not you, as with your own finger. Of special help is

7. *The Sesame Suck.* Some gay guys laughingly call this the 'lo-cal' suck, since it's done with 'no-cholesterol' sesame oil. It's currently in for dieters on a low-cholesterol intake to use cold-presses sesame oil brushed on toast instead of either the 'high-priced spread' or diet margarine.

Sesame-seed oil is really quite tasty and many of our gay friends find they prefer it to margarine or butter. The best brand we've found is *Hain*, obtainable in health-food stores. Your local supermarket may carry it. It does not have the oily taste of other vegetable oils, such as corn oil. It must be used only at room temperature (keep it in the refrigerator until at least an hour before use). Using it when it's cold makes it too viscous for taste (on toast) or sex (on trick).

QQ

Apply a dab of it on the tongue. Work it around the roof of your mouth—get the feel. Combined with intensified (by stages) suction, The Sesame Suck can be a really wild trip! And using it lightly on the tips of the fingers can make this auxiliary part of the suck scene all the more exciting. Use just enough to keep the fingertip pads cushiony and flexible and 'slide-able'. It's better than spit for ass-fingering, too. Somehow it causes the anus to open up more so that the finger can move around—and more deeply into—the rectum.

Also lightly anoint that large vein on the underside of his cock (corpus spongiosum—urethra) with the sesame oil (just a drop or two will suffice). Then lip-suction it from base to head. Use the oiled tips of your fingers to rub, tease, caress, gently press, enclose and any-other-way eroticize the rest of the cock (especially if it's thick and/or very long), simultaneously with sucking. It continually excites. Moreover, it offers the advantage of providing a legitimate breathing pause/space. If you want to extend sex to infinity, then The Sesame Suck will put you into orbit.

8. *Technical evaluation.* By practicing on your dildo(s) you will discover just which sucking variations are the most comfortable for you to perform. Then practice synchronizing them . . . going from one variation to another, smoothly . . . working for easy change. They try your various combinations on a real live boy! You'll generally find that you have developed a serviceable routine . . . one that you're confident with, and to which you may add variations as you wish to create a more impromptu seance.

Don't attempt impossibles, or even 'impracticables'. This should not cause you to be less daring or inventive, but you should do nothing that takes you out of the picture you're trying to put him into. All you get is an awkward sex scene. Even though you may have spent a lifetime sucking, you'll find that practicing different sucking combinations in-sync will provide you with a broader palette of sex colors. Never settle for a monotonous sex diet of just meat 'n taters. Put a little dessert in your sex life.

9. *Soundings.* It's often possible to determine what your sucking strategy should be just by talking with a new partner. Fine . . . forewarned is forearmed. But more often one is in the dark—not knowing until the sheet is pulled back what to expect.

After all, each of us is unique. But by maintaining an all-systems-alert for all-systems-go, the approach is made easy and the follow-through not March/April 1978

only just satisfactory, but often far-out.

For example, if you find your partner squirming uncomfortably, or voluntarily withdrawing, or resorting to masturbation before you've barely got his cock in your mouth, obviously he prefers something different than the brand of suck you're giving. You may be going at it too gently, when he wants it rough. Quickly change! This might be noted in his attempts to mouth-fuck you instead of your sucking him.

On the hand, your name may be 'Tex', and if you have a little rough-riding or bronco-bustin' in mind—if that's your preferred style—and he's the passive type who just lies there and loves it 'easy-does-it', you'll only disconcert him if you persist with your cowboy style.

Try to keep on top of everything. If one variation doesn't work too well, have another on the back burner. Constantly take soundings. It'll keep you on the *qui vive*, and make you an always interesting partner.

10. *Positions*. The most commonly-used positions are (a) performer hunched over reclining partner, head placed over cock; and (b) performer kneeling in front of partner, head in front of cock. (This latter position is one that is generally used in cramped quarters, such as in johns/cubicles.)

When 'bedding him', however, many more positions are available. These include:

1. Performer sitting on partner's chest, hunched over cock.

2a. Performer and partner lying face-to-face on their sides—one of the '69' positions for mutual sucking. This is often a more comfortable position than the following, in which—

2b. One partner lies on top of the other—their heads at opposite ends. If the top partner is of average weight this is a very effective position for mutual sucking. But if the top man is heavy (and relatively immobile), this can be decidedly uncomfortable for the bottom man.

Whichever position you choose, you may use the 'touch system'... tapping each other to indicate speed; this in order to delay orgasm of one partner, and thus make *simultaneous* orgasm possible.

3. Performer sitting, facing partner, with partner standing at cock-to-mouth level. This is especially desirable when the performer has a long torso.

4. In this position the performer lies on his back, his head propped up and forward on a firm pillow. The partner sits on the performer's chest, his body angled forward for insertion (positioning is crucial, because in this case the performer's teeth are at an

angle that can scrape his partner's cock).

5. Still another position is for the performer to lie on his back, partner in a pushup-like position, cock over partner's head (partner sustains the pumping action—mouth fuck).

6. In this position the partner lies on the edge of the bed, hips on edge of mattress, legs spread, feet on the floor, with performer sitting on partner's chest—hunched forward, cock in mouth, nose inserted in anus (possible when partner's cock is of considerable length, or semi-rigid, and when performer and partner desire simultaneous oral sex with anal-sex simulation).

Any variety of positions may be, and usually are, used. This adds variety, and often relieves a positional discomfort.

11. *'Withdrawal symptoms'*. The cock is at its most sensitive at the time of ejaculation. Thus the performer should not bobble about the cock at this time, but remain still. Orgasm is one thing that can't be topped. You can't make it greater than nature. If you try, you may inflict pain, and so upset and/or annoy your partner that he may never want to see you again. It's also amateurish. So when 'cum' comes, let it have its way. If you want to swallow it, fine. If you don't, at least let him cum in your mouth, holding it there until the last 'salute'. You can dispose of it secretly in a tissue, without hurting his feelings. Pity, though. Tastes so goo-o-o-d!

Be sure, however, that the cum is *really on its way*. Don't cease stroking prematurely. Also, give just *one* or *two* strokes when you actually taste the first of the cum... otherwise it may result in incomplete ejaculation.

Bringing your partner to orgasm is the prime motivation of sucking, of course. It's what sucking is really all about. Then, when he has finally, completely ejaculated, while your mouth is still on his cock (even though the mouth is bursting with cum), give one or two ver-r-ry gentle strokes as a finishing touch. It's really a gesture of obeisance—good sucking manners—and tells your partner that you've really appreciated him.

# MUSCLE CONTEST NEWS & NOTES

## U.S.A. Championships

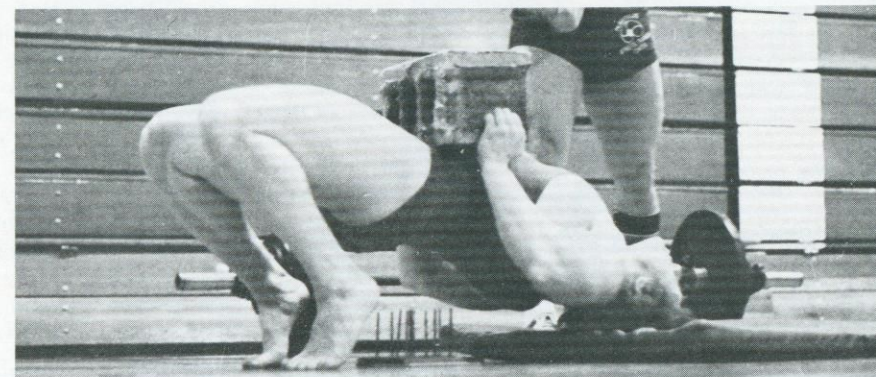

Kalman Szkalak, who won the 1976 AAU Mr. America contest, recently scored as winner of the AFAB U.S.A. Championships, a competition that drew top bodybuilders to the Beacon Theatre in New York City. The top champs usually train at the Mid-City Health Club when in the Big Apple. Photo courtesy Muscle Training Illustrated.

## Mr. Gold Coast

Bill Commerford is the new Mr. Gold Coast Gym, a contest held in Florida. He also won the following subdivisions: Most Muscular; Best Arms; Best Back; Best Abdominals; Best Legs. And he's only 19 years old. Photo courtesy Muscle Training Illustrated.

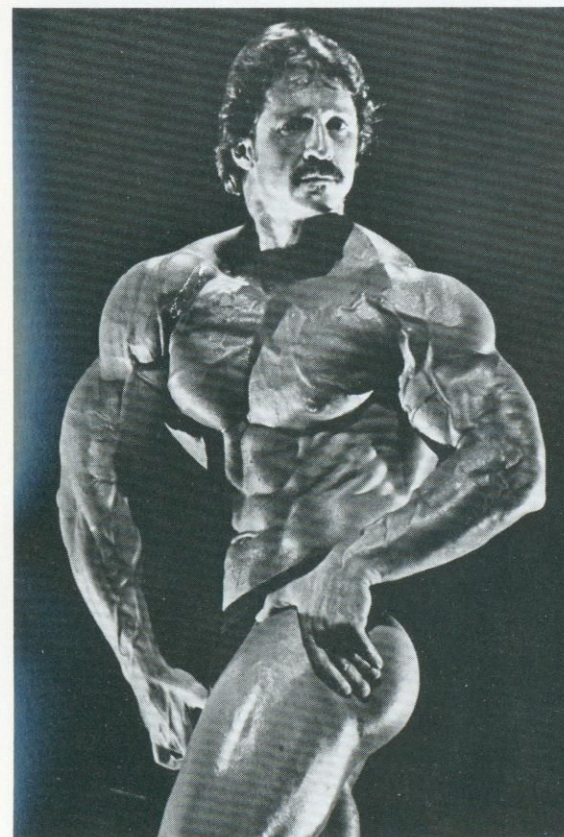

## Mr. U.S.A.?

Don Ross, who lives in Detroit, Mich., is the current WBBG Pro Mr. America. He is a professional strongman too—seen here supporting a concrete block across his midsection which is being smashed with a sledgehammer. Don will compete in the WBBG Mr. U.S.A. contest in New York City on May 20th. Details in Muscle Training Illustrated, sold at all newsstands.

## '78 Mr. America?

Clint Beyerle, a leading bodybuilder in California, came close to winning the AAU Mr. America contest last year. He's now training hard for a crack at the 1978 title; the contest will be held in Cincinnati, Ohio on Sept. 2nd. Check with the local YMCA for particulars. ## Mr. Olympus

Serge Nubret, who owns and operates a gym in Paris, recently won the WBBG Pro Mr. World and Mr. Olympus contests—and he will return to New York City on Sept. 9th to defend those titles. Details will be announced soon in Muscle Training Illustrated, the magazine we thank for permission to reproduce this photo.

with anything to sell, service, advise-about, card-read-in, fortune-tell, crystal-ball-gaze, ply-with, massage-on or instruct-in wants a listing. Gay lawyers, doctors (even board specialists), dentists, teachers, designers and clergymen, for example, are represented in this and other directories, and some in such formerly 'underground' weekly newspapers as *The Village Voice*, and, of course, in gay magazines such as *BODY*, *QQ Magazine* and *Ciao!*.

Nor does it stop there. While new gay designers, for example, have not yet been permitted to advertise their tasteful, exciting exotica/erotica on TV, they do appear as guests on talk-shows and news-shows, with camera focusing on their establishments, ideas or products, and so the effect, though by indirection, is precisely the same. Best of all, we're doing it with genuine pride—relishing it all the more because we're so long 'overdue'.

Because so many of us are so busy trend-setting; trying to get our gay projects operating successfully (and there are so many kinds of interesting new enterprises that only clever gay people could create), we are far more high visible as masses of individuals, and so, in a way, we are more vulnerable—more reachable. It follows that as we are more accessible, we are more 'quickie-ly' intimate with the greater numbers who are either gay customers or gay peer professionals. The result: over-familiarity. Although never let it be said that gay familiarity breeds contempt, it can certainly take the ginger out of eroticism, desire, and build-up. Thus one—busily minding the store—may tend to settle for while-away-the-time or why-turn-it-down sex. Fiberglas ass. Mr. Goodbar? We probably wouldn't recognize him if he came by and took the wrapper off his nuts.

Reverse insularity. Sexual desire, like bread to be baked, needs leaven. It can't rise in a vacuum, and this may be what our new freedoms are inadvertently causing. Although, of course, straights outnumber us, and always will, not all are ogres. A certain degree of communication with straights gives gay guys perspective—dealing with them hones our wits; we learn to appreciate and love ourselves better.

If that sounds self-serving it is not meant to. We are not *parvenus*, however much we richly deserve and juicily relish our new freedoms and opportunities.

Sexual desire is so closely related to contrast (how else could it be measured?) that to become *insularly* gay—living so inhibitingly in our own new world—is really a form of reverse

discrimination. Certainly it can bring about a still swifter diminution of desire for sex with our own. Thus it came with some sadness to read an article in *The New York Times* of October 25, 1977, by Grace Lichtenstein, entitled "Homosexuals In New York Find New Pride," in which Ronald Gold of the National Gay Task Force is quoted: "I can get my windows washed by a gay person, get my television repaired, do anything, and never see a straight person again."

Even though this may be taken out of context of the complete interview, there is a surprising tone of bitterness in the remark. The fact is, there are some beautiful straights out there in the U.S.A. who are our friends, and who—undemonstratively—have been helping us win many of our goals. They have helped give us real clout. This is suggested in a news item in the *New York Post* of October 28, 1977. In an Associated Press release from Lima, Ohio, headed "Anita Feels Backlash," we learn that:

*Anita Bryant says she has lost half of her income from bookings because of her opposition to homosexual rights and her appearance at a Lima religious revival Wednesday brought out 100 homosexual protesters and 50 policemen, which, Police Chief William Davenport said, harkened of Lima's racial unrest of the 1960s. In Chicago yesterday Miss Bryant said, "There are forces in this country who . . . want me fired only because I took a stand as a concerned citizen and for the protection of my four children . . . I am clearly the victim of a religious persecution, and this is another evidence of the moral decay in America."*

Well, it stands to reason that if only 10% of the total population of the United States is gay, and 90% straight, and that she has lost half her bookings/income, it's not just the backlash of the 10% gays but a lot of the 90% straights!

Many of these concerned straights have perhaps admired us more than we'd ever have believed. They think that we can all live together in peace if there weren't still such bigots as Anita and that \$2-Million Man, Billy Graham who are fighting reason and a losing cause.

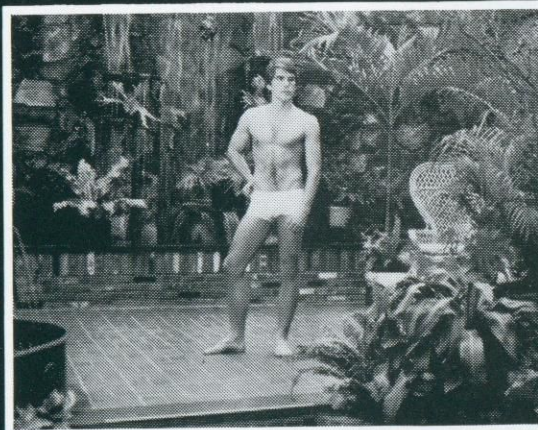

With the help of those straights who've always been quietly on our side, and many more who've seen our cause in a more realistic light, we can make this a more beautiful world for everyone. Thus we should avoid needless anxiety and frustration and not lose our cool. This can be better done if we don't become fiberglas-ass insular.
